

RESCUE AT HEIGHT CRANE OPERATOR RESCUE

HEIGHTWORKS TRAINING

Duration: 1 Day (Crane Access course can be added to make this a 2 day course).

Audience: Any person who may have the need to rescue an operator from a crane.

Course Aim: To provide practical experience and education so that a crane operator can effectively be lowered from the crane to ground level using a designated rope rescue system.

Syllabus:

- Pre use inspection of a rescue system
- Attachment to anchor points
- Attachment to operator
- Adjustment of rescue system
- Lifting the operator from the cab
- Lowering the operator from the crane platform
- Lowering the operator from the crane body
- Understanding suspension intolerance

Prerequisites: Competent with accessing and protecting against a fall whilst working on a crane.

Max. Ratio: 6 Delegates to 1 Instructor.

Certification Expiry: This certificate is valid for a maximum of 1 year.

Throughout the course, the student will be continually assessed and expected to complete a written and practical examination.

Only on successful completion of the whole course and examination will the candidate be issued with a certificate of competency.

This course is designed and delivered using BS8454 (code of practice for the delivery of training and education for work at height and rescue), IRATA international code of practice and equipment manufacturers technical instructions.
