Let us help you become more socially responsible

What sets Laird's Smarthomes apart from the rest?

We listen! Whether you are choosing an energy efficient environment or creating a technologically enhanced lifestyle, you should feel that when you have questions or concerns you have someone there to help. That is why we are here to make sure your experience is nothing other than enjoyable.

Home is where fun and comfort come together. It should be the place where you can kick back, take a deep breath, and truly relax. A Laird's Smarthomes installed system enhances your living environment through convenient controls, protective security, and plenty of entertainment options.

... many solutions

Working with Laird's Smarthomes is not a transaction but rather an interaction... the beginning of a relationship that will last for years. Laird's Smarthomes is your partner in efficient technologies.

For the past few years, Laird's Smarthomes has been a leader in home integration. Our goal is to provide you the service, the entertainment, the technology, and most importantly, the controls to allow you to easily enjoy your living environment to the utmost.

Laird's Smarthomes was founded in 2008 to provide an alternative solution to the somewhat confusing industry of electronic systems design. Founder Mark Laird offers an experience to his clients that delivers beyond their expectations.

Laird's Smarthomes for all your home integration needs, you will experience the pleasure of working with a single, competent organization instead of having the hassle and aggravation of trying to coordinate multiple companies to integrate your electronic systems into a single working design.

Laird's Smarthomes also coordinates with many other contractors to ensure a smooth process from design to installation. We work closely with painters, drywall specialists, electricians, interior designers, architects, and others.

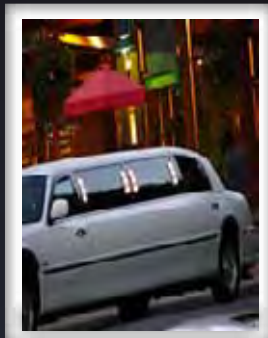

Laird's Smarthomes ensures that every client is properly matched to each solution that has been recommended to them. It's nice to know that in an evolving world of technology, there is a company looking out for you.

SMART HOMES

A day in the life of a Laird Smarthome Home...

Dim the lights and set the temperature to the desired level, push play to your favorite Sinatra album, keep a virtual eye on the kids, and then Google a new recipe for dinner... all from one of the conveniently located touchscreens in the kitchen. With remote capability you gain full control of your home from anywhere in the world. Best of all, these convenient controls are saving energy making them truly worth the investment. Laird's Smarthomes is the solution to a home designed for lifestyles of today and prepared for lifestyles of the future.

For more details, speak with one of our representatives today!

"There's an App for that!"

As if there weren't enough "apps" for the iPhone... now you can add home security. Make sure your kids have arrived safely at home by remotely giving them access and receiving a message notifying you of their safety. Also available in the palm of your hand is access to your cameras to keep a watchful eye on your kids and the overall well being of your home.

Lifestyle Solutions

1

Energy Management - Ever surprised at how high the electricity bill is? An energy management system allows you to monitor and control your energy consumption of the air conditioner, lights, electronics, and some large appliances, giving you a detailed history as well as an accurate real time analysis so you know exactly what to expect the next time you get the bill in the mail.

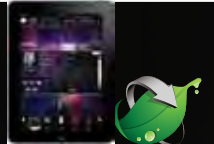

2

Home Protection - Want to make sure your child makes it home safe from school? Now you can have the door unlocked for them and then receive a text message with a picture ensuring their safety. A security system also allows you to secure your Safe and/or drinks cabinets

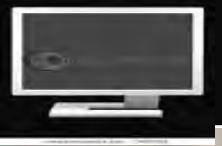

3

Lighting Control - Program the lighting to turn on and off according to pre-established scenes or photocell sensors. Program all on / all off switches for convenience and security while at the same time saving energy.

4

Computer Management - We manage your homes Computer systems, we can deal with your broadband issues, hardware upgrades, laptops, entertainment media systems, software and more and we can help you maximise your investment by connecting systems to your home entertainment.

5

Entertainment Simplicity - With activity based buttons, it's as simple as selecting "Watch TV" or "Watch Movie" and the system takes care of the rest from turning on the TV, Blu-ray, and receiver to dimming lights down and even closing the shades. What could be easier?

6

Sports Simulation - Raining outside? Play golf inside! A new era of sports simulation has arrived. You don't simply press a button, you actually swing the club and kick the soccer ball. Or drive the car we will create a virtual sports environment right in your own home theatre.

7

Whole House Audio - Relax in your favorite room, bath tub, or the pool. You can have your favorite tunes wherever you are in the house through the whole-house audio system.

8

Home Theatre Experience - Bring the Movies Home by installing a state of the art Home Theatre System including an HD Projector, Blu-Ray DVD, 7.1 surround sound speakers, and plush theatre seating.

How we work

The Process

We take the often complicated world of technology and simplify it.

When there is so much out there in the constantly changing world of technology, you need someone you can trust to create the right solution for you. There are very sophisticated systems and then there are basic systems. Our goal is to discover what is truly the best for your needs and wants.

At Laird's Smarthomes, we take ownership of our projects and believe every step of the way is important to the final results. From the very first time we meet with you to the final day of in-house training, we're here to make the entire process as smooth and as enjoyable as possible.

How we work

The way we operate is yet another reason that sets us apart. From the proposal, to the plans, to the final training materials, we provide extensive details to clearly define the project scope and to make sure you have a complete understanding at every step of the way. As the homeowner, you will never be left in the dark as we will keep you updated and informed throughout the entire process.

Future homes, today!

1

Design & Planning

First step is to meet and review your visions, ideas, and goals for the systems in your home. We then offer our input and together we lay out a plan to move forward. This step must be taken prior to the start of construction.

2

Pre-wire & Preparation

Many do not realize that our crew begins alongside many other contractors right after the framing of the house. We pre-wire for all necessary systems and take precautionary steps before walls are closed in to minimize potential obstacles down the road.

3

Installation & Programming

We return to the project to connect all wiring and install the systems specified in the design. Some systems require special programming and are addressed by qualified technicians. Finally, we walk through the home and provide you with any necessary training.

What clients are saying about Laird's Smarthomes

case study

The *Testimonial*

There's no better testament to the quality of a company than reviews from actual clients. Here is what a few of Laird's Smarthomes clients have to say:

I currently run a successful garden design and landscaping business. Over the past few months Mark has opened our eyes to the wonderful technology available for integration into our garden designs. Working with Laird's Smarthomes we have a symbiotic relationship providing ever better solutions for our clients and thus the best garden solutions in the area! My only regret is we didn't do this earlier!

Mark did a wonderful job, I would give him 5 'gold' stars! He's Just great, very knowledgeable, very dependable, professional, cooperative, and he is full of knowledge. Very trustworthy!

When it comes to professionalism, Mark and his team deliver! There completely trustworthy! We went on holiday to come back and our home was completed! Mark even did the hoovering! I continue to recommend Laird's Smarthomes to friends and family.

I would highly recommend Laird's Smarthomes to anyone. I already have to several people. They are very professional, polite and friendly. Best of all, they follow through and keep communication lines open every step of the way. I was extremely impressed with the plan they made for my home. It is a dream to be able to listen to music throughout my home while doing mundane household chores.

I also was able to call on references since I found them on the internet. I heard nothing but glowing reviews from other people who built homes. They were indeed the BEST "sub-contractors" we had. Last but not least, I was happy with the price and did not feel I was being taken advantage of. I had shopped around and price compared. I am grateful for the wonderful customer service and look forward to working with them again in the future when I need to upgrade my system. I am thankful to know there are good businesses out there who remember that the customer is #1 and have integrity. Thank you Mark!

The *Laing* Residence

Stuart Laing is the Managing Director of Laings of Glasgow, a family run business for over 150 years and one of the most prestigious Jewellers in the country. Not surprisingly Stuart has a fine eye for quality and detail. It was a "huge compliment" to be selected to work on the Laings beautiful traditional family home in Troon Ayrshire. Stuart said "Our home was a difficult challenge, Mark has bent over backwards and worked through many obstacles to get the job done. And always in a timely manner!, I would recommend Laird Smarthomes to anyone looking for a first class service."

“ It’s hard to find somebody who is good at what they do, good at follow-through, and who’s just a pleasure to work with, and they’re all of that.”
