Designflooring: Take a closer look

We find the inspiration for Designflooring in the beauty of the natural world and feel passionate about bringing this into every product we create. From the intricate grain details in real woods to the timeless tactile qualities of natural stones, we've used the latest technology to bring you floors that are the ultimate in style and give you exceptionally high performance and quality. What's more, we've already chosen the best colours, formats and design components for each of our ranges, meaning it's easy to create the perfect design floor for your home.

Plank variation

Our planks are designed to reflect the variance and random character of natural materials, rather than looking uniform and manufactured.

Wear layer

With a protective wear layer on each individual plank and tile, our floors are designed to withstand the everyday hustle and bustle of home life.

Do you love the authentic, rustic look of traditional crafted wood planks? Or perhaps you prefer the distinctive texture and intricate patterns of quarried stone? Whatever it is you're after, you're sure to find a look that's just right for you in our wide range of stylish, high quality Karndean Designfloors.

The right look for every room

We know that style is personal and every space is different. To help you find the right floor for your home, see what each of our ranges have to offer:

Designflooring: Inspiration

How to create your perfect floor...

We have put together a quick guide to help you design your new floor. Your floor can be as simple or as intricate as you'd like. Follow the steps below to be on your way to creating a floor that's just as unique and individual as you are.

1 Choose a main colour and effect

We have an extensive range of colour tones in our **Inspired by Wood**, **Inspired by Stone** collections.

Inspired by Wood:

Choose from our wide selection of planks, each featuring realistic grain and knot details and textures. We offer a varied range of styles ideal to suit any room in your home.

See **Wood ranges at a glance** on pages 152-155

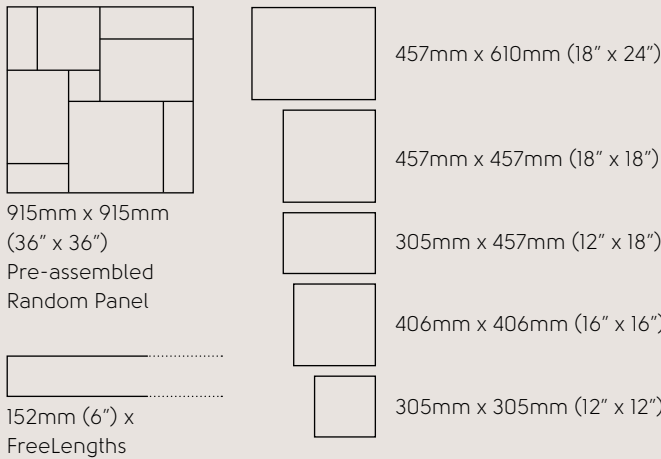

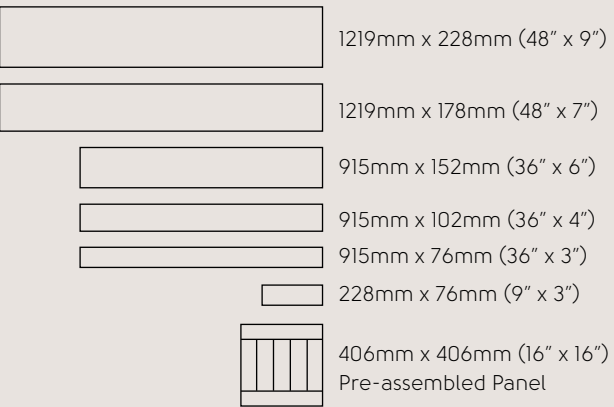

Inspired by Stone:

Choose from a palette of natural beiges and browns to cool blues and greens. With tiles including marble, slate, terracotta and ceramic effects plus our Michelangelo range of mosaics, pebbles and metallics.

See **Stone ranges at a glance** on pages 156-157

We offer a wide range of plank and tile sizes. To find out available sizes for your chosen product, please see the individual product pages.

2 Add a design strip

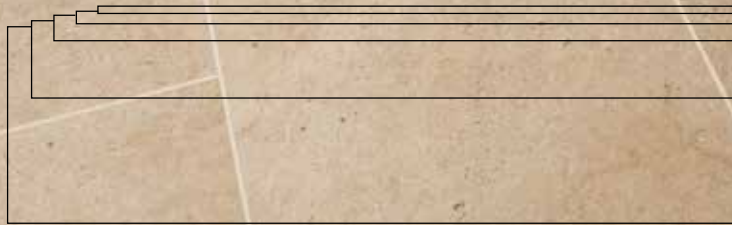

Once you have chosen your main floor colour, you have the option of adding a decorative strip...

Inspired by Wood:

Add a strip between wood planks to create an attractive ship's decking effect.

Inspired by Stone:

We highly recommend adding a narrow strip to a tile floor to create a natural grouting effect.

Grout Strips

Available in two widths:
3mm and 5mm
Six colours.
See page 113

Design and Metallic Strips

Available in five widths:
3mm, 5mm, 10mm, 30mm & 76mm
A wide palette of colours.
See pages 112-115

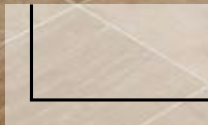

*Define your space and
get creative with strips*

3 Add a border

To personalise your floor even further or to help define your space, why not add a border?

Keyline Borders

Use single strips to define a space.
See pages 112-115

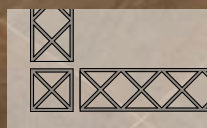

Tramline Borders

Use a combination of strips to create more emphasis.
See pages 112-115

Decorative Borders

Choose from a range of patterned borders designed specifically to complement your chosen floor.
See pages 116-121

4 Add a feature

With seven standard designs to choose from and the ability to design your own, a feature creates a focal point in your room. See pages 122-123

Boasting the realistic designs and grain details customers expect from Karndean, LooseLay is available in large scale wood look planks and stone look tiles and can help you create a look that works in almost any space. What's more, it's easy to install and can be laid over most existing hard floors. Oh, and it's 100% recyclable!

Why Karndean LooseLay?

Up to 27°C

Individually replaceable

Should you need to replace a piece, simply lift the damaged plank or tile and replace with a new one.

Acoustic qualities

Karndean LooseLay is perfect for projects where you want to reduce noise levels in the room below, such as playrooms, bedrooms and garage/ loft conversions without the need for underlay.

Comfortable underfoot

useful notes

Draw a sketch of the shape of your room with rough measurements to take to your retailer. They will visit your home as part of the service, to take accurate measurements and give expert advice.

A photograph of a room featuring a wooden floor, a white cabinet with drawers, and a brown leather bag. The floor is made of wide, dark brown wooden planks with a prominent grain. In the background, there is a white cabinet with six drawers arranged in two rows of three. Each drawer has a dark metal handle. A brown leather bag is placed on the floor in front of the cabinet. To the right, a white door with a brass handle is visible. The wall is covered in a light-colored, textured wallpaper.

Colour & Pattern Reproduction

We are careful to make sure our brochures are accurate and printed to very high standards, but photography and printing cannot always create a perfect representation of our products. For this reason we strongly recommend that you look at a sample of any product you are considering before placing your order.

All of our products are inspired by things we have seen in the natural world and just like variation in colour and detail is part of the beauty of nature, it is also a feature of some of our designs. This means that with some of our products you will see natural variation when your floor is laid. If in doubt, ask your retailer to show you a larger sample of the product.

We love developing new ideas and improving our existing designs. Part of our policy of continuous improvement means that we may add, change or withdraw products from our ranges. We hate to disappoint and will always try to work with you to find an alternative design that you love so much.
