

ST440 STEP FRAME LOW LOADER

The New Sterling 44T Step Frame Low Loader is a new innovation for Sterling, building on our success with Rigid Plant Bodies. It has been developed due to customer demand for a Trailer Supplier manufacturing to the 'Higher Standard'. Initially available as a Tri-Axle 13.6M Trailer, with 4.0M Double Flip Ramps, and with a range of options to suit general plant and access haulage requirements.

The Higher Standard.

RAMPS

WINCH & FRONT BUMP BAR

DOUBLE BEND GOOSENECK

SLIDE OUT HANDRAIL SYSTEM

OVERVIEW

Initially available as a Tri-Axle 13.6M Trailer, with 4.0M Double Flip Ramps, and with a range of options to suit general plant and access haulage requirements.

Ramps are sideways sliding which allows machines of all widths to be safely loaded.

It is fitted with a two-stage neck as standard, with a maximum loading angle of 9 degrees which makes it suitable for any plant or low ground clearance machinery.

In keeping with our core values, the Sterling design is extremely customer centred (or demonstrates customer collaboration), and includes innovative recessed lashing rings to ensure safer and quicker securing of loads.

Full fall arrest systems can be specified to allow safe unloading on site.

Designed with creativity, craftsmanship and innovation it meets the needs of the customer, this is an exciting new development which will allow our customers to take the next step forward in the specification of their fleets.

WEIGHTS TABLE

Axle type	Weight
Axle 1	8000 kg
Axle 2	8000 kg
Axle 3	8000 kg
Kingpin	14000 kg
GVW	38000 kg

WHY CHOOSE STERLING?

1 THE HIGHER STANDARD

Our stringent Quality Assurance processes, combined with high quality materials and CE marked components, guarantee the reliability of the product and minimise down-time. Those exacting standards extend to our customer service too, the Sterling culture of integrity means responding quickly and keeping you informed at every stage of the process.

2 BUILT TO LAST

Our products are built using only the finest and strongest materials, finished off with a galvanising process that ensures they stand the test of time. This eliminates the need for costly maintenance, making the cost of ownership lower. It also means that many truck manufacturers value a truck fitted with a Sterling body with up to 10% higher residual value.

3 INSIGHTFUL INNOVATIONS

Intelligent additions, like our electro-hydraulically operated ramps, not only save effort, they save fuel too. That means lower operating costs overall. Or how about something you can't put a price on? The unique shallow loading angle of our cheesewedge ramp dramatically improves loading safety, giving you peace of mind.

4 SMART DESIGN

Intelligent innovations are made all the better when they are easy on the eye. Our clean aesthetics give a visual boost to your brand image, hiding rams on our cheesewedge design and keeping overall clutter to a minimum.
