

PROCESS ENGINEERING

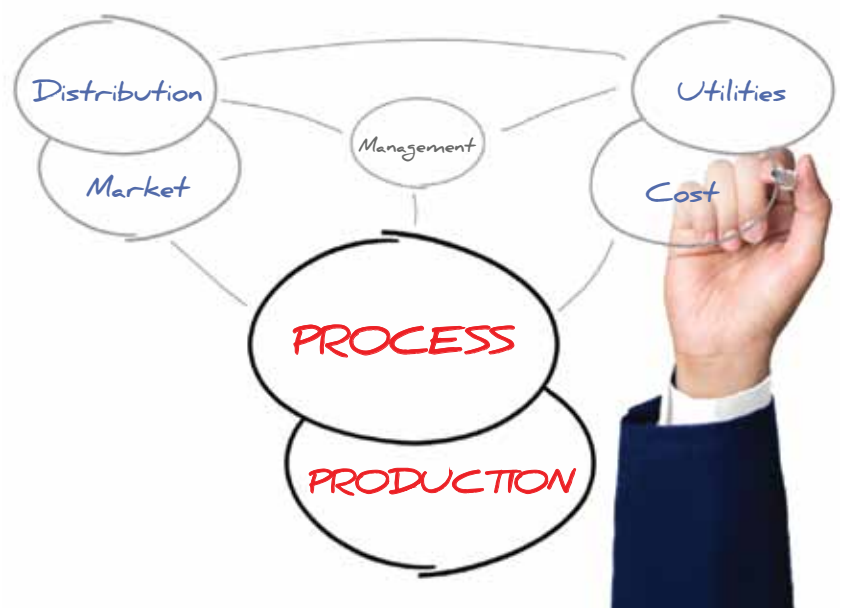

QUALITY - INNOVATION - FLEXIBILITY

Any investment in modern, state-of-the-art processing, deserves an appropriately engineered solution that will provide quality product for today's consumers and a platform from which to develop tomorrow's processes and exciting new products.

At High-Tech Processing (UK) Ltd, we are proud of our process development and implementation record where functionality, time, cost and ongoing support of the process is key.

Our Process Engineers are capable of undertaking all aspects of process design from conception, through to the detailed design, implementation and commissioning.

- Dairies
- Soft Drinks
- Breweries
- Wineries
- Food Processing
- CIP Systems
- Process Equipment
 - Upgrades
 - Refurbishment
 - Installations

ABOUT THE HIGH-TECH GROUP

Established in 1997, the High-Tech Group has grown to include five specialist companies namely:

High-Tech Processing (Pty) Ltd
High-Tech Processing (UK) Ltd
HTP Packaging (Pty) Ltd
Advanced Technology Suppliers (Pty) Ltd (ATS)
Appropriate Engineering Solutions (Dubai) (AES)

Over the past 17 years, HTP has worked in 26 countries on four continents and has established a worldwide presence in the industrial and process construction market.

The company growth has been consistent and controlled, creating a well balanced and stable partner for our clients.

We analyse, recommend and implement processing solutions, from equipment procurement to full turnkey installations.

Our full range of services include project and construction management, engineering, design, procurement, project controls, feasibility studies and technical master plans.

HTP allocates a mandatory resident construction manager to each of their sites ensuring that essential direct personal contact required for the successful execution of a project is maintained.

HTP has a proven track record evidenced most clearly by the fact that 80% of our business is repeat business.

This is a result of forming solid client relations, determining clients' expectations and delivering quality products at competitive prices.

We wouldn't risk our reputation by providing anything less than the results you demand.

For further information please contact John McIntosh on telephone number +44 1234 711 231.
