

Wildlife Habitat Creation

Landscape Management

Gardiners currently service around 4,000 sites throughout England and Wales. We work with companies including Severn Trent Water, Black and Veatch, Costain and MWH Global.

Many of the sites we are required to work on are potentially hazardous and may involve working near water or areas which have the potential of exposure to gas. As such, our operatives are all fully trained and inducted to work on such sites. Our approach to Health and safety is of paramount importance to our employees and others they may come into contact with.

Our Grounds Division can help you with:

- Grass cutting
- Tree and hedge maintenance
- Weed control
- Landscaping
- Habitat protection and pond creation
- Fencing
- Pest control
- Emergency clearance works

Tree Removal and Hedge Reduction
