## Bremont adds to the Z series with the introduction of the ALTI-ZT/51

FEBRUARY 2016

The ALTI-Z formed part of the launch collection back in 2007, and has become central to the Bremont offering over the years. Basel 2015 saw the launch of an updated version with the highly anticipated ALTI-ZT. This range was designed with aviators and world travellers in mind. Legibility was absolutely essential when it came to the aesthetic. The 'ZT' stands for 'Zulu Time' and allows the wearer to display local time together with the official world time standard. Unsurprisingly the Z chronometer has proven to be widely popular amongst the military squadrons Bremont works with - a significant and ever-increasing part of the Bremont business.

The ALTI-ZT/51 adds a new dimension to the range whilst integrating a very important design cue from Bremont's past. Bremont Co-Founder, Nick English explains; "For me the ALTI-ZT is arguably the most handsome and practical GMT chronograph we have manufactured to date. It is beautifully simple, easy to read and a watch you would happily see strapped to your wrist in 20 years' time. One of our most iconic limited editions to date is the sought-after Bremont P-51. The heritage look and feel of this timepiece inspired many collectors internationally and it seemed fitting to pay tribute to it through the new ALTI-ZT/51."

The design of the ALTI-ZT/51 pays tribute to the sought-after Bremont P-51 Limited Edition

The ALTI-ZT/51 maintains the clean legible dial with its new applied and bespoke coloured Super-LumiNova® index markers, and with the 24hr function having been moved to the bezel for improved clarity. Greater detailing around the stepped sub dials with micro lines on the ZT models has been made to give the dial more depth.

Functionally the ALTI-ZT/51 has the same features as the ALTI-ZT/BK with the integration of the Roto-Click® bi-directional inner rotating bezel. The GMT hand combined with chronograph functionality measuring seconds, minutes and hours make this model ideal for travel. For additional clarity Bremont deploys the same hand design as the MB series, including the second time zone marker, which has been so effective on the MBIII. The ALTI-ZT/BK hands are used again but this time with several layers of bespoke coloured Super-LumiNova®.

As with most core range pieces the ALTI-ZT/51 has a specially treated 43mm stainless steel case made to an exceptional hardness of 2000 Vickers, which is seven times that of an average stainless steel watch case. The convex sapphire crystal is equally as hard and has nine layers of anti-reflective coating applied to both sides of the glass for increased legibility. The high standard of finish and attention to detail seen in everything from the hand-cut and engraved winding rotor in the sapphire crystal case back to the meticulous machining of the three-part Trip-Tick® cases take considerable time and skill to apply.

## ABOUT BREMONT

Bremont is an award-winning British luxury watch brand, manufacturing mechanical watches in Henley-on-Thames, England. Bremont is also making considerable investment with its UK watch making and manufacturing and at the end of 2014 launched a new facility in Silverstone to manufacture case and movement components.

Co-founded by brothers Nick & Giles English in 2002, Bremont has made a substantial impact on the watch industry in a very short period of time. The brand remains true to its original principles of; British, Aviation, Engineering and Adventure.

As well as manufacturing watches for some of the most exclusive military squadrons around the world, Bremont continues to play an influential role in revitalising the British watch industry, the birthplace of numerous timekeeping innovations still used today. Recent collaborations have seen Bremont work with the likes of aviation giant Boeing and the iconic British automotive company Jaguar.

Bremont has been appointed Official Timing Partner to the 35th America's Cup and to the defending champion, ORACLE TEAM USA. Renowned as the oldest trophy in international sport the America's Cup first took place in 1851 on the waters off England's south coast. As the first official British timing partner to The America's Cup since 1851 Bremont has embarked on a very exciting project to produce a special edition collection of timepieces to celebrate its involvement.
