WA LIMESTONE QUARRIES

WA Limestone is one of the biggest suppliers of road construction and building materials in Western Australia with quarries strategically located all over the Perth metropolitan area. From these locations, WA Limestone supplies over 40 different types of raw materials products to contractors, state government, local government, and the wider Western Australian public.

CRUSHED LIMESTONE PRODUCTS

75mm Limestone: used in freeway, highway, road and driveway construction.

19mm Limestone: used in road construction and limestone blocks.

10mm Limestone: used in the production of masonry products for residential and industrial purposes.

5mm Limestone: used for agricultural purposes and soil remediation.

Bitumen Stabilised Limestone: used in road construction as basecourse.

Limestone Armour: 1-12 tonne used in breakwater construction, water revetment protection and pipe covering operations.

Limestone Core/Rip Rap: used in breakwater construction, water revetment protection and pipe covering operations.

Filter Rock: used in soil stabilisation, drainage and bedding applications.

Spalls: used in landscaping and stone pitching.

SAND PRODUCTS

Fill Sand: used in road construction and domestic/commercial subdivisions.

Brickies, Plaster & Paving Sands: used in domestic and industrial building construction and masonry works.

Concrete Sand: washed sand used in the manufacture of concrete.

Lawn Sands and Topsoil: used for landscaping and gardening purposes.

White Beach Sand: used for beach and dune nourishment projects.

MAJOR ROADS PROJECT SUPPLY INVOLVEMENT

- Northlink – Stages 1, 2 & 3
- Armadale Road Upgrade
- Murdoch Drive Freeway Entrance
- Mitchell & Kwinana Freeway extensions and duplications
- Reid Highway duplications and extensions
- Marmion Avenue
- Tonkin Highway
- Kwinana Freeway & Forrest Highway
- Mandurah Entrance Road – Mandjoogordap Drive
- Great Northern Highway

WA LIMESTONE

MARINE CONSTRUCTION

The company has 40 years experience and specialises in marine projects that involve the supply and construction of marine structures.

We have extensive experience in the construction of breakwaters, seawalls, groynes as well as production of various rock sizes for underwater pipe cover protection in the ocean.

WE HAVE THE IN-HOUSE EXPERIENCE TO

Source the rock

Drill, blast and manufacture core and armour rock

Transport materials

Place materials to specification design

Conduct land based dredging works

Implement and operate GPS survey control

MAJOR PROJECT INVOLVEMENT

- Perth Stadium Bridge – Optus Stadium
- Garden Island Causeway
- Safety Bay Channel works
- Quinns Groynes
- City Beach Groyne rebuild
- Augusta Boat Harbour
- Port Geographe Busselton
- Catherine Point
- Dampier Port
- Darwin Port
- Australian Marine Complex Henderson
- Jervoise Bay Henderson
- Geraldton Marina
- Onslow Marina
- Mindarie Keys Marina
- Hillarys Boat Harbour
- Exmouth Marina
- Jurien Bay Marina
- Dawesville Cut
- Halls Head Canals
- Fremantle – Fishing Boat Harbour, Success Harbour
- Challenger Harbour & Rous Head

CIVIL WORKS, CONTRACTING, MACHINE HIRE, CRUSHING AND SCREENING

WA Limestone has been active in the civil and contracting space for many years. We have been involved in some of the largest Main Roads WA projects over the past 20 years. Our expertise in the extraction and delivery of raw materials as well as road construction, has seen us become alliance partners in the following projects:

- Kwinana Fwy/ Forrest Hwy – Southern Gateway Alliance
- Mandurah Entrance Road – Mandjoogoordap Drive – Southern Gateway Alliance
- Perth Freight Link – Roe Hwy – BR8 Alliance
- Wanneroo Road Duplication – MRIA
- Armadale Road Duplication – MRIA
- Murdoch Drive Entrance road – MRIA

We specialise in large cut to fill projects and hardstand construction. Our heavy plant and equipment allows us to move large amounts of raw materials in short time periods and provide solutions for moving earth that is hard to excavate.

WA Limestone provides wet and dry machine hire as well as crushing and screening equipment to projects all over the state. Our plant list includes:

- Dozers
- Graders
- Excavators
- Longreach Excavators
- Loaders
- Articulated Dump Trucks
- Rollers
- Water Trucks
- Crushers & Screens
- Rockbreakers

WA LIMESTONE

WA BLUOMETAL

WA Bluemetal was established in the mid 90s has become one of the major suppliers of granite products to the metropolitan and surrounding country areas of Perth.

CRUSHED PRODUCTS

20mm Aggregate: used in drainage, concrete and asphalt construction.

14mm Aggregate: used in drainage, concrete and asphalt construction.

10mm Aggregate: used in drainage, concrete and asphalt construction.

7mm Aggregate: used in drainage, concrete and asphalt construction.

5mm Aggregate: used in drainage, concrete and asphalt construction.

Rail Ballast: used in railway construction as well as some drainage applications.

Metal Dust: used in drainage, concrete and asphalt construction.

Road Base: used in freeway, highway, road and driveway construction.

OTHER GRANITE PRODUCTS

Granite Armour/ Core/ Rip Rap: 1-10 tonne used in breakwater construction, revetment protection and pipe covering operations.

Filter Rock: used in soil stabilisation, drainage and bedding applications.

MAJOR PROJECT SUPPLY INVOLVEMENT

- Swan River Pedestrian Bridge
- Rous Head
- Elizabeth Quay
- Barrow Island Jetty
- Fremantle Ports
- Kwinana Freeway Extension & Forrest Hwy
- Kwinana Freeway Extension (Thomas Road to Safety Bay Road)
- Perth Mandurah Railway Line
- Kwinana-Bunbury Rail Line re-laying project
- Fremantle-Perth Rail Line re-laying project
- Perth Desalination Plant – Kwinana
- Alcoa – Tailing Dams
- Bannister – Landfill
- HMAS Stirling Garden Island Redevelopment

W.A. BLUOMETAL

NORTH WEST OPERATIONS – PILBARA

WA Limestone has established three hard rock quarries in Western Australia's North West. These quarries were established to supply the demands of the oil and gas sector, mining, construction and civil works in the North West.

With locations in Roebourne, Port Hedland and Onslow we can offer granite armour products, road base, sealing and concrete aggregates and sand to anywhere in the area.

CRUSHED PRODUCTS

20mm Aggregate: used in drainage, concrete and asphalt construction.

14mm Aggregate: used in drainage, concrete and asphalt construction.

10mm Aggregate: used in drainage, concrete and asphalt construction.

7mm Aggregate: used in drainage, concrete and asphalt construction.

Rail Ballast: used in railway construction as well as some drainage applications.

Metal Dust: used in drainage, concrete and asphalt construction.

Road Base A & B: used in freeway, highway, road and driveway construction.

OTHER GRANITE PRODUCTS

Granite Armour/Granite Core/Rip Rap: 1-10 tonne used in breakwater construction, revetment protection and pipe covering operations.

Filter Rock: used in soil stabilisation and drainage and bedding applications.

Sub Sea Heavy Ballast, Scour protection Armour & Pipe Stabilisation Armour: used in underwater applications to protect subsea pipelines.

PROJECTS

- BHP Railway Ballast Upgrade
- Onslow Road
- Onslow Marina
- Barrow Island Jetty
- Wheatstone
- Rio Tinto Railway Ballast Upgrade
- Karratha Powerstation
- Port Hedland Airport
- Roy Hill Mine
- BHP South Flank
- Various Main Roads Sealing projects
- Dampier Harbour

WA LIMESTONE

WA PREMIX

WA Premix is a major supplier of commercial, structural, residential and decorative concrete across the Perth metropolitan area.

We are a supplier to federal, state and local infrastructure projects, as well as commercial and residential developments. Our people have the unique expertise to work with our customers to provide the best possible solution to achieve the outcome required. We use locally sourced raw materials and all of our concrete plants are fitted with the latest state of the art technology in concrete production.

Our concrete plants are situated in Neerabup, Bayswater, Bibra Lake & Mandurah. With a fleet of over 40 concrete agitator trucks, we can supply anywhere in the metro area from these locations.

www.wapremix.com.au

MOBILE PLANTS

WA Premix also has mobile concrete plants that can be moved anywhere in Australia for small to large capacity projects. Our plants can be set up on site quickly to service the high volume demand for major construction projects.

PROJECTS INVOLVEMENT

- Northlink Stage 3 structures
- Perth Stadium – exposed aggregate
- Karel Ave Bullcreek structures
- Secret Harbour Shopping Centre
- Mitchell Freeway Extension
- Harvest Lakes Shopping Centre
- New Mandurah Bridge
- BHP – Southflank
- Cimtec Henderson – Workshops
- Armadale Road structures
- Wanneroo Road Duplication
- Murdoch Drive structures
- Reid Hwy Upgrade structures

HEAVY HAULAGE

WA Limestone can offer heavy haulage services with our specialised fleet of heavy duty trailers and platforms.

Our drivers are very experienced and we can travel anywhere in Western Australia in a safe and efficient manner.

CAPACITY

150,100, 85, 50 tonne floats

Flattops and drop-deck trailers also available

WA LIMESTONE

LIMESTONE BUILDING BLOCKS

Founded in 1983, Limestone Building Block Company is a well-known and respected manufacturer of natural and reconstituted limestone block products to the Western Australian commercial and industrial market. Our well known brands include the Limestone Building Block, Archistone and Moore River Natural range of products.

Our main production quarry is located in Nowergup, and we have sales yards in Wangara, Bibra Lake and Mandurah.

www.limestonebuilding.com

INDIGENOUS PARTNERSHIPS

In 2016 WA Limestone formed a joint venture partnership with Jurali (WA) Pty Ltd to engage the Pilbara Indigenous community, which in turn enables WA Limestone to employ traditional land owners and their families.

Jurali has been established to enable three Language Groups to pool their resources and work collaboratively with a view to procuring significant contracting opportunities on their land.

The basis of the joint venture is that WA Limestone will take on the technical, commercial and financial risk for significant projects, while Jurali carry out the operational requirements of the project. We strongly support this partnership and look to expand this relationship into the future to create more opportunities for traditional landowners.

OUR PEOPLE

The quality of our team is a key driver of our success. It is through the success of our people that the company continues to grow and do great things.

We can only deliver creative, effective solutions for our customers through the unique skills and perspectives of our employees.

Our people are central to our success and work in a wide range of disciplines and professions across our business.

WA Limestone offers its people the ability to work in diverse roles, in different locations and realise new opportunities within the company over time. We are focused on ensuring our people can be involved in the future of the business and look for new opportunities to grow and develop by creating an environment in which employees can derive meaning and empowerment from their work, and feel they are making an active contribution.

Our strong, values and performance based culture is a key part of looking after our people. The Company's core values of Safety, Teamwork, Prosperity, Tolerance, Integrity and Environment form the basis of all aspects of our operations.

WA Limestone has a range of initiatives in place to help make sure our people are working in rewarding roles with real opportunities for growth.

At WA Limestone, we create an environment in which our people find value and meaning in their work, and deliver outstanding performance for our customers and communities.

Our in house professional team is made of experienced,

- Business Managers
- Civil and Structural Engineers
- Surveyors
- Estimators and Planners
- Quarry and Project Managers
- Construction Supervisors
- Environmental and Safety Managers
- Human Resources and IR Managers
- Maintenance Superintendents and Engineers
- Operators
