

Contract Installation Engineer

Position

Tellemachus currently require a Contract Installation Engineer to assist on an Ad-Hoc basis. Customer Site based throughout the UK.

Must be able to work at short notice, we will provide 1-2 weeks' notice where possible.

Zero-hour contract.

Role

We are looking for a pro-active and energetic individual who thrives in a challenging SME environment, interacting with internal & external customers and being part of a dynamic Technical Services Team.

The ideal candidate will have a proven track record of installing CCTV, IT, Wireless & Security related infrastructure, within a high quality and Health & Safety environment, delivering services to mainly Corporate and Government clients.

This role will involve working at height & traveling throughout the UK with frequent overnight stays.

Description

The role covers the onsite installation and support of a range of technical systems ranging from IT infrastructure (including copper & fibre cabling), wireless telecoms systems through to CCTV and Access Control. It is an extremely "hands on" and varied role delivering professional technical installation capability across the entire technical services function as required.

Work day: Monday – Friday 09:00hrs – 17:30hr (requires flexibility and some OOH's working) + frequent OT

Hourly rate based – Dependant on experience.

Accountability and Reporting

The role reports directly to the Technical Engineering/ Project Managers on a daily basis.

Required Competencies

- Full clean UK driving Licence.
- Efficiency – Able to produce significant output with minimal wasted effort
- Teamwork – Reaches out to peers and cooperates to establish an overall collaborative working relationship.
- Work ethic – Possesses a strong willingness to work hard & sometimes long hours to get the job done.
- Flexibility – Adjusts quickly to changing priorities and conditions. Copes effectively with complexity & change.
- Enthusiasm – Exhibits passion and excitement over work. Has a can-do attitude.

- The ability to communicate effectively & efficiently.
- Eye for detail.
- Self-Motivated / work under own initiative.
- Ability to work effectively under time pressures.
- Ability to read drawings and plans.
- Computer literate.

Principal Accountabilities

This role sits within the Technical Services team providing technical infrastructure installation capability.

Including but not limited to:

- Installation of CCTV, Access Control & Wireless equipment.
- Installation, termination & testing of structured cabling (CAT5/6)
- Installation of cable management: cable tray, conduit, trunking and cable basket
- Installation, termination & testing of fibre optic cabling including fusion splicing
- Physical installation of IT equipment such as servers, PC's & UPS's etc.
- Installation, termination & testing of RF cabling (coax etc.)

Desirable Experience

- Installation experience of structured cabling (CAT5/6 or fibre optic)
- Installation experience of CCTV or Access Control
- Practical experience of general, electrical or mechanical installations
- Construction site experience
- Experience of IP microwave wireless equipment and mast climbing

Desirable Qualifications

- IPAF MEWP certification
- CCNSG/CSCS or equivalent H&S card
- C&G or NVQ level 2 or 3 in related discipline e.g. electrical, building services, mechanical engineering etc.

What we offer

- Hourly rate – based on experience
- Expenses including meal allowance
- Single occupancy accommodation
- Full team engagement where input will help us achieve our ambitious growth plans

Additional Information
