

# WHO ARE MICAR COMPUTER SYSTEMS?

Micar

We're an industry-leading provider of tailor made Enterprise Resource Planning (ERP) software solutions for the fashion industry.

Our **Creation** software application is used by leading fashion suppliers, manufacturers and distributors across the world to manage and maintain purchasing, manufacturing, importing, inventory, distribution, sales and financial control.

## WHAT'S CREATION SOFTWARE?

Developed exclusively for the fashion sector, our Creation Software app is a natural extension from a conventional software system to an advanced, highly configurable bespoke solution.

## SERVING THE FASHION INDUSTRY FOR 25 YEARS.

25 YEARS

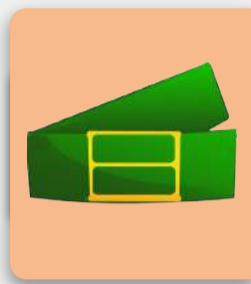

## WHAT MARKET SECTORS DO WE WORK IN?

CLOTHING

FOOTWEAR

ACCESSORIES

## DID YOU KNOW?

Our Creation Apparel ERP application was one of the first to be written specifically for the fashion industry.

## WHY CHOOSE MICAR?

### KNOWLEDGE AND EXPERIENCE

We're a Microsoft Gold certified partner of 10 years and we've got over two decades experience developing software applications for the apparel industry.

### A PROVEN TRACK RECORD

Our customers love us and you will too! We've retained our customer base by offering a flexible, fully scalable user-friendly software platform and a consistently high standard of customer service.

### EMPATHY

We built up an understanding of the fashion industry through developing 100's of bespoke applications for a diverse range of clients.

## THE ANATOMY OF OUR CREATION SOFTWARE APPLICATION

Creation is a fully scalable software solution that can incorporate any of the modules listed below.

### PRODUCTION CONTROL

A highly configurable, yet intuitive production control system that provides the end user with total control over the production process.

### STOCK CONTROL

A multi-location stock control system, providing fast access to accurate product inventory at the touch of a button.

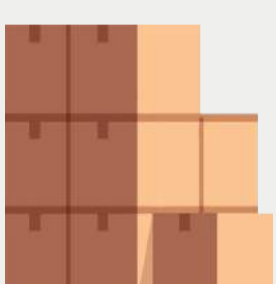

### PURCHASE ORDER MANAGEMENT

A highly configurable purchase order management system that uses a range of efficient processes and functions to streamline the ordering process.

### EPOS

A stock control system that's designed to meet the ever-evolving demands of the retail fashion sector, seamlessly integrated with our ERP solution.

### TEXTILE PRODUCTION

A solution developed to handle all front and back-office operations for textile production.

### CREATION MOBILE

An advanced bespoke software app created specifically for use in the fashion sector, from the warehouse to the showroom.

### CRITICAL PATH

Give customers the key information they need to identify activities, tasks, and production status & delivery schedules.

### FINANCIAL CONTROL

A highly configurable finance system that incorporates a series of tools that are used to recognise, maintain and optimise the financial status of your business.

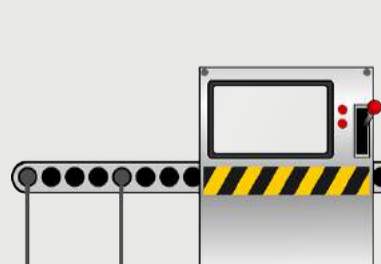

### FABRIC AND COMPONENT CONTROL

A fabric and component package, designed to empower the end user with full control over the raw material life cycle.

## SERVICES AND ONGOING SUPPORT

We provide a comprehensive range of support services to complement our industry leading ERP software system.

### IMPLEMENTATION

Our six stage Creation implementation process clearly defines project milestones and responsibilities, speeding up the delivery process and promoting user acceptance.

- Consultancy
- Testing
- Planning
- Training
- Implementation
- Deployment

### MAINTENANCE

We'll provide you with ongoing preventive, corrective and perfective maintenance services.

### SUPPORT

Our in-house software development team provides day-to-day telephone and remote assistance to your staff.

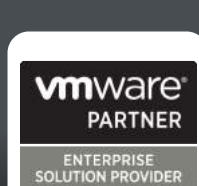

### STAFF TRAINING

We'll provide one-to-one and group training sessions of up to 25 staff members.

Minimise errors, increase productivity and control your business with our industry leading software solution.
