

The **deepest** cave in the World...

The **fastest** submarine in history...

The **first** automatic lunar rover...

The world's **biggest** rocket...

Reach for the **ultimate** with Vostok Europe watches!

EXPEDITION Everest Underground

Expedition to the deepest cave in the World

Dedicated to the World Record of the Lithuanian-Ukrainian expedition achieved bottom of the "Everest Underground"- Krubera-Voronia cave, the deepest cave in the World (2197 meters). During the expedition all speleologist checked time by Vostok-Europe watches with tritium tubes.

Undine

Legends about Undines - water nymphs, spirits of water - came from Baltic and German-Scandinavian mythology. The word "Undine" descends from ancient Lithuanian (Indo-European) word Unduo (water). Undines live in forest pools and waterfalls, appear as beautiful young women with long hair, singing and dancing under the moon and calling out to young men by name, luring to the water and seduce them...

EKRANOPLAN

The biggest ground-effect vehicle ever designed

The Ground Effect Vehicle, called «Ekranoplans» in Russian, carries massive payloads quickly and economically. The «Caspian Sea Monster», which was designated the **Ekranoplan KM**, stands as the largest vehicle of this type ever designed and built. With a length of 100 meters and weighing in at 544 tons, the Sea Monster was powered by ten Dobrynin VD-7 turbojet engines.

ENERGIA-2

The most powerful space launcher in history

The most powerful space launcher in history and universal space rocket system "Energia" was created between 1976 and 1987. With a payload capacity of nearly 100 tons, "Energia" furthered the development of space research in unprecedented ways.

The Soviet space program further intended the development of a whole range of unified heavy and super-heavy rocket-carriers based on the "Energia" model. The rocket class depended upon the special configuration of the side blocks and the modification of the central block, which would have allowed delivery into geostationary orbit of a wide array of objects up to 200 tons.

Dr. Giorgos Sakkas

Scientist and free diver

Dr. Giorgos Sakkas is a Professor of Exercise Physiology at the University of Thessaly, Greece and Professor in Lifestyle Medicine at Cardiff Metropolitan University in UK. His scientific career began at the University of Athens in Greece, continuing at a graduate level in the UK and working for many years as clinical researcher at the University of California San Francisco, in USA. He has been competing in all free diving and pool disciplines and coaching many athletes since 2005, under the brand name "Dr Apnea" while he has been the National Team Captain for two World Championships. He has translated and edited to Greek the book of Umberto Pelizzari "the Manual of Free Diving" while since 2008 is an International Apnea Academy Instructor. Dr Sakkas has published more than 100 research articles, including the only available studies dealing with the concept of Human Aquaticity. Dr Sakkas has achieved many national records in the disciplines of DNF and CNF.

ALMAZ

Space station

The „Almaz Space Station“ is the name of basic project of Soviet space station created at the beginning of 60-ties. All Soviet orbital stations („Saliut“ and „Mir“) and modern Russian block of ISS (International Space Station) were built on base of the same Almaz project.

Pilot **Jurgis KAIRYS**

Unlimited aerobatics

World champion

Vostok-Europe brand ambassador Jurgis Kairys has never let the sky be his limit. One of the most respected and well-known aerobatic pilots on the planet, the Lithuanian Kairys holds many world records and is considered a "pilot's pilot". As an aeronautical engineer, Kairys participated in development of many Sukhoi aerobatic aircraft, including his own "Juka" model. He is a multiple World Grand Prix of Aerobatics Overall Champion and invented several signature aerobatic maneuvers, including the aptly named "Kairys Wheel". He is the first pilot to ever perform the "Cobra" maneuver wherein a fixed-wing aircraft is made to hover like a helicopter. Kairys also flew inverted under a seven-meter high bridge in Kaunas and under all bridges in Vilnius, Lithuania. Vostok-Europe is now proud to be a part of this famed pilot's flight gear.

BIG Z

Žydrūnas SAVICKAS
World's Strongest Man

Zydrunas Savickas

Lithuanian professional strongman and one of the greatest strongman competitors of all time. He is the only modern strongman competitor to have won every major strongman competition, most notably the Worlds Strongest Man in 2009, 2010, 2012 and in 2014, Fortissimus in 2009, the Strongman Champions League 2008 & 2012, the World Log Lift Championship in 2008, 2009, 2011, 2012 and 2013, and Europe's Strongest Man 3 times in 2010, 2012 & 2013. Savickas is often referred to by his nickname, "Big Z"

Benediktas Vanagas

Dakar 2019 record holder for Baltic states

Benediktas Vanagas B.V.

Meet the sportsman who is Dakar 2019 record holder (11th place) for Baltic states and who won Dakar 2015 among privateers! He is one of the most versatile drivers in the Baltic states and Vostok-Europe brand ambassador for extreme sports. Over the past decade and a half, Vanagas took on the challenge of hundreds of rallies and motorsport events around the globe. He captured the top spot in the 2013 and 2016 Palanga 1000 kilometer race behind the wheel of a Porsche 997 GT3 Cup S and secured 2nd place in 2009 and 2010 in the world most known Ladoga Trophy off-road marathon. His future plans include the FIA World Cup for Cross Country Bajas while wearing Vostok-Europe on his wrist on sharp turns and over rugged mountain passes.

LUNOKHOD-2

Automatic lunar-rover

Lunokhod 2 was more advanced and the last of two unmanned lunar rovers landed on the Moon as part of the Soviet Lunokhod program on January 15, 1973.

Lunokhod 2 operated for about 4 months, covered 37 km of terrain, including hilly upland areas and rilles, and sent back 86 panoramic images and over 80,000 TV pictures. The 37 km journey remains the longest any robotic rover has ever been driven on another celestial body. Many mechanical tests of the surface, laser ranging measurements, and other experiments were completed during this time.

K162 Submarine **ANCHAR**

The fastest submarine in history

The world's fastest submarine, the Soviet K-162 "Anchor", reached a world record speed of 44.7 knots (82.8 km/h) during test trials in the 1970's. Built to be a super-fast attack sub, the titanium hulled Anchar carried the NATO distinction of "Papa" class. Regarded as the predecessor to the more widely known "Alpha" class, the Anchar served the Soviet navy at the height of the Cold War and holds speed records up to today.

ROCKET N1

The world's biggest rocket

The super heavy Rocket N1 was created to launch Soviet cosmonauts to the Moon, Mars and Venus, and to place huge space stations into orbit. It was the Soviet counterpart of the American Saturn-V. The rocket N1 was a titanic feat of engineering consisting of 5 stages! It's first stage involved a cluster of 30 high-powered rocket engines using kerosene and liquid oxygen as a fuel.

EXPEDITION North Pole 1

The first manned drifting polar station

North Pole 1 was the first Soviet manned drifting station used for scientific hydrological and geographical research of polar area.

The North Pole-1 polar station was opened on June 6, 1937 some 20 kilometers from the North Pole and operated for 9 months, during which the ice floe travelled 2,850 kilometers. The expedition ended 75 years ago – on February 19, 1938 the Soviet ice breakers took four polar explorers – hydrobiologist Piotr Shirshov, geophysicist Yevgeny Flodorov, radioman Ernst Krenkel and the leader Ivan Papaninov – from the station close to the eastern coast of Greenland.

GAZ-14 LIMOUSINE

Luxury car

The luxury car GAZ-14 stands as one of the greatest achievements in Soviet automotive history. Built exclusively for Soviet high-ranking officials and politicians from 1977 through 1989, these luxury seven-seaters were famous for their advanced technological design and comfort to rival any of the American juggernauts. The multiple advancements in the GAZ-14 became a platform for innovations, designs and technologies incorporated into the mass production of many other Soviet-era model cars.

	Watch case material		Dry Box package

Strap's size

Heavy duty buckle

Genuine leather strap

Silicon strap

Nato strap

Metal bracelet

Screw driver / multitool for straps replacement

Based in Vilnius, Lithuania, Vostok-Europe fuses two of the most exciting elements in the watch world today – a great story for each model and construction designed for the most extreme sports.

With watches tested in the Dakar Rally, at the bottom of the world, to the edge of the atmosphere and beyond, Vostok-Europe truly is for going to extremes. Couple this with each watch being inspired by a Soviet achievement in engineering or exploration and they don't just tell time; they tell a story.

Every Vostok-Europe is constructed and built to withstand the most rigorous conditions – from deep diving to space explorations, many use the constant illumination technology of Tritium tubes and all are

Built for Going to Extremes!
