

MOBILE INSPECTIONS

PRODUCT HIGHLIGHTS

- perform a variety of workplace inspections using smartphones and tablets
- create your own workplace inspection checklists, such as health and safety, for use in education, healthcare, construction, and many other environments
- reduce preventable workplace accidents by creating service tickets on-the-spot when problems are encountered
- dynamically revise inspection checklists as facilities change, new problem areas are identified, and government regulations evolve to achieve continuous quality improvement

FieldFLEX™ provides you with powerful mobile workplace software to track & manage your assets, maintenance and facility operations throughout your organization.

An organization's facilities are required to be compliant with many safety and operational regulations. Maintain compliance with the regulations that affect your facilities in real-time with FieldFLEX™. Conduct, revise and update your own inspections on mobile devices to rapidly respond to change. Automatically trigger remedial work action where deficiencies are identified on-site.

FieldFLEX™ provides a compelling return on investment through mitigation of an organization's exposure to risk from accident litigation; accident clean-up and repair expenses; government fines; and damage to an organization's brand. Maximize operational effectiveness, and the health & safety of your organization with FieldFLEX.
