

Board-Walk

Open Mesh walkway for fragile roofs

- EASILY PORTABLE MESH WALKWAY FOR USE IN ALL WEATHER CONDITIONS
- 2M, 3M & 4M SECTIONS EASILY LINKED
- CAN RUN VERTICALLY UP, OR DOWN, OR HORIZONTALLY ACROSS THE ROOF
- OPTIONAL HANDRAIL AVAILABLE
- WALKWAY WIDTH 600MM

Board-Walk is an open mesh walkway that allows access from eaves to ridge whilst spreading the load on support battens to provide the user with a safer working position. The system is lightweight, easily portable and suitable for fragile roofs.

Board-Walk is modular construction and features 2m, 3m and 4m sections which are easily linked together and an integral work positioning line. Optional accessories include single and double sided handrail, a Roof Hook and a Valley Stop End.

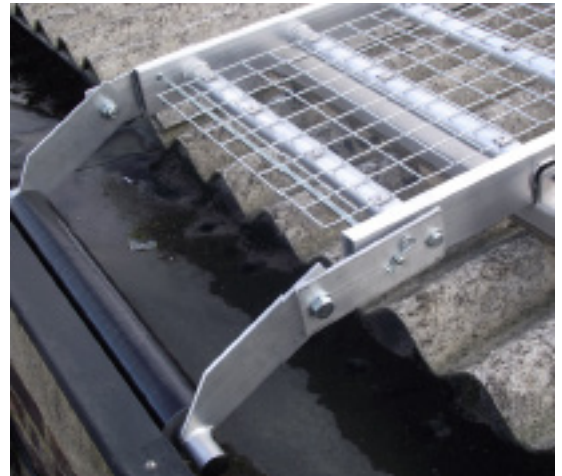

Each system is designed to fit specific individual roof sizes and configurations and can be installed to run vertically up, or down, or horizontally across the roof.

Technical Details

- Length: 2m, 3m & 4m sections
- Walkway Width: 600mm
- Material: 6082T6 high grade aluminium
- Total Weight: 28 kg
- Max Pitch: 30°

Compliance

- EN 12811-1
- EN 795:2012
