

## Just a few of the Industries we cover.

### Oil & Gas UK

All of our doctors are certified medical examiners for Oil and Gas UK, and yes, they too have had to escape upside down from 5 metres of water in the helicopter escape training pool!

### Renewable Wind Industry

Our doctors are approved to undertake medical assessments in accordance with Renewable UK medical fitness guidelines for near offshore and land based projects. In other words... we can make sure you are fit to work in the Renewable energy sector.

### Civil Aviation Authority

Our aviation medical examiners are qualified to certify pilots and cabin crew flying under EASA regulations. As a commercial or private pilot we will ensure that you maintain your fitness to fly.

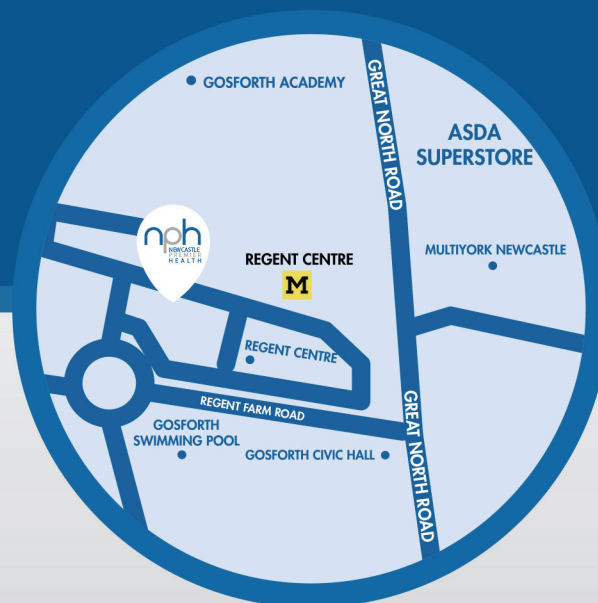

In the unlikely event that you have a medical problem, we can arrange speedy investigation and treatment to help get you flying again as quickly as possible.

### Tradespeople

We are HSE appointed doctors approved to perform screening for workers exposed to lead, asbestos, radiation and isocyanates. We have the necessary expertise to ensure your business is operating in line with legislative guidelines.

to name but a few...

## Discover our Services

### Occupational Health

Healthy employees are happier, more productive and more supportive of the changes necessary to keep your business ahead of the competition. We assist businesses and HR Managers to improve the wellbeing of their work force, by meeting statutory health requirements, reducing sickness absence, and minimising the impact that health problems have upon business continuity.

### Health & Wellbeing

Education and information are vital elements of a health and wellbeing agenda for your workforce. Our specialist nurses can provide seminars, workshops or one-to-one advice covering a broad range of health related issues, including healthy eating, diet and exercise, blood pressure and cholesterol, stress, cancer awareness, and any other topic you may wish to arrange.

### Private GP

Everyone prefers sufficient time to discuss his or her personal health and wellbeing concerns. Our doctors have extensive medical experience and expertise, and can address the concerns you or your family may have in a calm and relaxed atmosphere. If need be we can arrange appropriate investigations and can fast track you to the best local consultants for specialist care.

### Travel

No matter where in the world you're travelling to, our Travel Clinic can help ensure that you, your family and your employees get there and come home safely. Our specialist travel nurse provides information, vaccination and any necessary medication to help protect your health, whether you are travelling for business or pleasure.

### Counselling & Physiotherapy

Great health involves care of the mind and body. Through our network of partner organisations we offer access to high quality counselling and physiotherapy services delivered by renowned local providers at our Regent Centre clinic in Gosforth.

## Medicals & Surveillance

### Health Surveillance

There are many reasons to carry out high quality health surveillance. HSE regulation, statutory requirement, pre-employment screening and commercial tender requirements are a few of the reasons your business may need to undertake health surveillance. Our clinical team is fully mobile, comprehensively equipped and able to deliver on site monitoring at your premises or at our modern clinic at the Regent Centre, Gosforth.

### Bespoke Medicals

Whether you drive a taxi, an aeroplane or a bus, operate in a safety critical role, or undertake work where a regular medical assessment is required, Newcastle Premier Health can provide medical assessment for anyone that needs confirmation of their fitness for work. This includes pilots and cabin crew, offshore workers and divers, office executives and trades-people, and individuals seeking work overseas.

### Executive Medicals

For those individuals that are critical to business continuity – a bespoke medical assessment taking into account personal history, lifestyle, investigations and measurements.
