Get the best from your GRP fabrication machinery

Machine Operator or Maintenance Training Courses

Our 1-day training courses are designed to help you get the most efficient use and best performance from your **GRACO, MVP & IRAC** GRP production equipment, to produce the very best end products.

Suitable for novices, experienced users and even supervisors.

What you'll learn:

- *The health & safety guidelines for the GRACO, MVP or IRAC model*
- *The key components and how they work*
- *How to operate pumps*
- *Machine set-up and testing*
- *Cleaning, shutting down & maintenance for daily use*
- *How to use guns, power heads, fluids and catalysts*
- *Routine maintenance techniques*
- *How & when to change hoses*
- *Troubleshooting & fixing faults*

“training for up to 6 operators, delivered at our HQ or at your site & covers everything operators need to know”

“get full use from your GRACO, MVP or IRAC model and produce even better end products ”

How you'll benefit:

- *Your workplace will be safer*
- *More efficient use cuts down on waste & materials costs*
- *Better operator techniques produce the best end products*
- *Proper maintenance keeps your machine working longer*
