

# Centre for Weather Forecasts, Reading

Constant Air Systems Ltd have worked with this client since 2008 on their site in Reading, Berkshire, completing a wide range of works on their existing chilled water system including:

- Replacing 8 No. 500+kW chillers including all pipework services.
- Installation of chilled water to Denco units within data centre.
- Installation of chilled beams throughout office spaces.
- Replacement of plantrooms including pumps, plate heat exchangers and pipework services.
- New building console room, including new glazed partitions, suspended ceilings, lighting, mechanical, data, sprinklers and electrical installations.

We acted as principal contractor for all works.

**The total contract value was circa £5,000,000**
