Recently, we changed our name from On Site Shredding to Paper Shredding Services plus we have a brand new look and depot with extra space and state of the art facilities.

Our new name reflects the fact that we don't just offer shredding services at your location using our mobile shredders. Of course, we still do that, but we do so much more! You could use our off site shredding service if you have the following:

- **Restricted Access to your premises**
- **Small amounts of materials to be shredded**
- **Shredding budget concerns**

We're also here to advise you on why you should shred at all, what should you shred and the advantages to your business.

WE CAN HELP PROTECT YOUR BUSINESS

For customers wishing to take advantage of our **lowest cost shredding service**, we will accept deliveries of your materials for shredding or recycling at our factory.

Please call us on **0800 071 4000**, [visit our website](http://www.weshredpaper.co.uk) or use our [online enquiry form](#) for more details.

TESTIMONIALS

"We have been using Paper Shredding Services for many years to destroy our paper and digital records. From the start, they carried out our shredding requirements with diligence, professionalism, and dedication to customer service. And with a certificate of proof of shredding and recycling of all documents, we rest assured after every visit that our clients' data is securely destroyed, which is vital for their protection."
