

THE
CORNER
FRIDGE
COMPANY

THE CORNER FRIDGE • COLD ROOMS • WINE CABINETS

DEFYING CONVENTION

A big fridge in the kitchen is a dream for many people, so live the dream with The Corner Fridge Company

In just 1m² of kitchen you can have the equivalent capacity of four to five standard refrigerators. So, whether you have a large family, small family or live alone, you can keep all your fresh food in the Corner Fridge.

Likened to a TARDIS®, the Corner Fridge has 1300 litres of capacity so all your food and drink can be stored inside. Unlike traditional fridges the air circulates, removing air pockets, keeping your fresh food fresher for longer.

What does this mean for you?

With more space to store your fresh and healthy food the Corner Fridge can save you time and money. The wide shelves and clean layout ensures you have an optimal overview of what is in your fridge. No more cramming your healthy food into a corner and forgetting about it, the Corner Fridge offers maximum space for your fresh food.

With the Corner Fridge there is:

- Capacity to store a vast variety of fresh food
- Room to store prepared dishes
- Convenience with all your food and drink in one place
- Less need to shop so often
- Less kitchen cupboard space required
- Freestanding and integrated or built in fridge options
- Minimal space required - 1m²
- Lowest noise level and lowest energy consumption in its class
- 1300 litres capacity to cope with large families or a gourmet's enthusiasm!

Why do you need a Corner Fridge in your kitchen?

Found yourself throwing food away every week?

A recent study* has found that an average British household will throw away six meals every week, the equivalent of £60 a month! The main reason for this is that food has perished and must be thrown away.

When fridges are tightly packed, this reduces the air flow and creates air pockets which are harmful to your fresh food and will therefore cause it to perish quicker. This causes families across Britain to waste a huge amount of food. The Corner Fridge incorporates innovative technology that allows your fresh food to stay fresher for longer.

With more food and drinks requiring storage in the fridge, this is causing a strain on standard fridges that cannot support the increased amount of goods stored in them. The limited space and air flow means that the cramped food deteriorates quickly. This can be solved with the Corner Fridge. By taking advantage of the unused corners of your kitchen, the Corner Fridge can store as much as five times a standard fridge and leaves plenty of room for air to circulate.

In the UK our love of quality fresh food is growing and government education initiatives tell us to eat healthier and therefore we need the space to cater for this.

The Corner Fridge is the perfect solution

All your food and drink can be stored in this modern version of the pantry. Your food stays fresher for longer and can all be accessible in a cool and convenient place - The Corner Fridge.

*Sky News November 2013

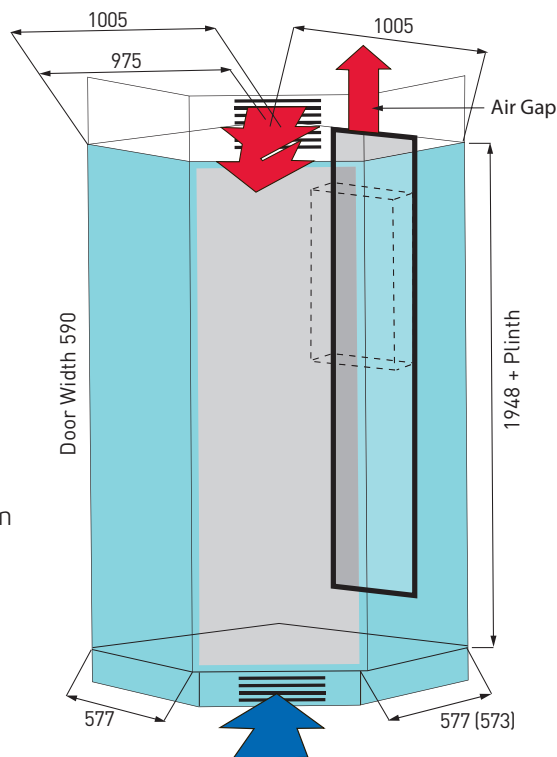

The Corner Fridge

Key Features at A Glance:

- Outstanding 1300 litres of capacity
- Temperature range 3°C - 12 °C

from each corner
- Noise Level
- 36dB/28dB
- Insulation
- 54mm Isofoam
- Energy Consumption
- 400 Watt
- Coolant - R134A
CFC-free 0.2kg

Warranty Information

All our appliances, including the Corner Fridge, are supplied with a two year manufacturer's warranty (UK mainland only). In purchasing a Corner Fridge or Cold Room you have bought the ultimate in refrigeration, as well as total peace of mind.

With a 'no quibble', two year electrical/mechanical fault guarantee (UK mainland only), our products are engineered to offer many years of service and reliability.

You can rest assured that in the unlikely event of your appliance failing, with just one short telephone call, your appliance will be up and running again within a short space of time.

For customers outside the UK, a two year parts only warranty applies.

Technical Information

Power supply

A three metre flex with plug for a 13amp earthed socket is supplied. A 13amp earthed socket is required on the right hand wall and should be positioned 80cm from the corner and 220cm from the floor.

Noise level

Under normal circumstances, the noise level is approximately 36dB measured at a point 1m from the door when the compressor is running. In the 'Stand-by position', the level is approximately 28dB.

Adjustable legs

Our fridges have adjustable legs which can be set between 145mm and 175mm. The minimum acceptable for ventilation purposes is 100mm.

Ceiling height

Please ensure that you have a minimum height of at least 2000mm. At this height we allow 50mm at the top and 100mm at the bottom for ventilation.

Ventilation/air supply

The unit gives off heat which MUST be vented via the upper compartment, so that the compressor does not have to operate more than necessary on account of the high temperature in the immediate vicinity.

Installation

The Corner Fridge can be integrated into all types of kitchen. Installation is very simple and is done on-site. Where you are integrating to the ceiling, extra ventilation grilles must be fitted above the fridge.

Important maintenance

The filter on the front panel must be vacuum cleaned every three months. Failure to do this will cause the temperature to rise gradually. All shelves should be washed in warm soapy water once a month and dried thoroughly prior to being placed back in the fridge.

Cold Rooms

Bring life to your kitchen with the Cold Room

A Cold Room is the solution for you when you want the finest of fridges but have no corner space to utilise. We offer a range of cool rooms to make it easy for you to seamlessly integrate a cool room into your fitted kitchen.

All our cold rooms come complete with floor, ceiling, walls, shelves, cooling unit, micro light switch, various fixing materials and an integral cooling room door with hinges and frame.

The cool rooms are constructed from prefabricated cool room elements which have an extremely good insulation value and the steel structure has a FoodSafe finish. The FoodSafe surface is highly wear-resistant over a long period of time and inhibits the growth of bacteria.

We want to ensure that you love your cold room as much as we do, so we have created three variations to suit your needs and ensure that you have the ideal cold room for your kitchen.

You can choose between:

- **The Integrated Cold Room** - offers seamless integration into your fitted kitchen.
- **The Freestanding Cold Room** - for when you want your cold room apart from your kitchen units.
- **The Bespoke Cold Room** - the one of the kind Cold Room. We create and build a customised cold room just for you.

Integrated Cold Rooms

Integrated Cold Rooms, like the Corner Fridge, will also store your fresh food and cooked food in perfect condition, so dishes can be prepared in advance and stored until required.

This innovative Cold Room maintains a larder-like atmosphere and an even temperature of 5°C keeping your fresh foods fresher for longer.

Integration of your Cold Room couldn't be made any easier.

All our Cold Room doors and sides correspond to the standard 60cm wide cupboard. Therefore all you need to do is order your matching panels from your kitchen supplier and your Cold Room will be seamlessly integrated into your beautifully fitted kitchen.

What does this mean for you?

A large refrigerator in your kitchen saves you time, money and energy. You can store more of your fresh, healthy food in your fridge and you'll always have an overview of all the food and drink in the house - it'll be in the Cold Room.

Integrated Cold Room Key Features at A Glance:

- Outstanding capacity which varies with size
- Temperature range 3°C - 12°C
- Easily adjustable chrome shelves
- Flexibility with four adjustable door shelves
- FoodSafe white scratch resistant interior surface for durability
- Integrates easily into your kitchen
- Door can be left or right hinged
- Easy to assemble and install
- A range of accessories are available
- Choice between compact or split TL6 unit
- Two year guarantee!

Technical Specifications:

- Width - 1200mm
- Noise level - 36dB/28dB
- Insulation - 50mm Isofoam
- Energy Consumption - 400 watt
- Coolant - R134A CFC-free 0.2kg

Integrated Cold Rooms come in three sizes:

(all sizes in mm)

1. 1200w x 1948h + plinth (150) x 600d
2. 1200w x 1948h + plinth (150) 1346d
3. 1200w x 1948h + plinth (150) 1690d

Remember:

Bespoke Cold Rooms are available if none of the sizes above work for you.

Freestanding Cold Rooms

Freestanding Cool Rooms are the ideal solution when you want your refrigeration to stand apart from your kitchen units. Our Freestanding Cold Rooms come complete with a set of shelves, floor, lighting, doors and cooling unit.

Key Features at A Glance:

- Stand-alone (*not for integration*)
- Choice of four sizes
- Temperature range between 3°C -12°C
- Variety of alternative layouts available for the door and cooling unit
- Comes complete with a surface-mounted floor, four wire epoxy coated shelves on each of the two walls and a light which comes on automatically when you open the door.
- Includes TL6 or TL10 refrigeration unit depending on room size - a more powerful cooling unit can be specified for applications other than for domestic usage.
- Two year guarantee!
- Auto-Defrost
- Free delivery to mainland UK to suit you.

Freestanding Cold Rooms come in four sizes:

(all sizes in mm)

1. 1200 x 1200 x 2108h
2. 1200 x 1800 x 2108h
3. 1800 x 1800 x 2108h
4. 1800 x 2200 x 2108h

Remember:

Bespoke Cold Rooms are also available if none of the sizes above work for you.

DEFYING
CONVENTION

Not sure exactly what you want?

Please call us on 0845 061 6622 and we can take you through the options.

Bespoke Cold Rooms

For the unique Cold Room experience, the Corner Fridge Company supply cold rooms that are tailor-made to your requirements.

Manufactured specifically for you, there is no doubt this is a one of a kind refrigeration experience.

Simply specify the dimensions of your perfect Cold Room, whether you want it integrated or freestanding and we will help you to find the best solution. So let your imagination loose. Our Bespoke Cold Room service offers you the opportunity to create the Cool Room you've always wanted.

In order to be able to supply a quote for a made-to-measure room, we require the following information:

- The use of the Cold Room
- Length, Width and Height
- With or Without a Floor
- Interior Required - white wire shelves and lights?
- Standard Door, Integrated Door or Insulated Door
- Type of Refrigeration Unit required - Compact or Split
- If Split required, how far away should the warm side be?

picture shows a bespoke cold room installation utilising a room off the main kitchen area

Building your own Cold Room

The Corner Fridge Company also supplies equipment so you can custom build your own cold room. All of our products were designed to ensure that you can build your unique cold room with ease and simplicity. Equipment you can buy includes:

Refrigeration Units

High quality units with low noise levels and power consumption, as well as easy installation. There are a variety of units to suit your cold room size with split refrigeration units also available.

Cold Room Doors

Integrated and surface mounted doors are available, with left and right hinged options.

Shelving and Lighting

These can also be purchased for your cold room.

Check out our website www.cornerfridge.com and go to 'Equipment for Building your own Cold Room' section to see all the items currently available.

Accessories & Spares

To ensure you make the most of your Corner Fridge or Cold Room we have a range of accessories to suit your needs. They are designed to make your life easier and saves you time when storing your fresh food.

- **The Inner Cold Door** - prevents the cold from escaping over the floor and saves your energy. Its fresh blue colour gives it an attractive appearance.
- **LED Light with Motion Sensor** - for use in your cold rooms.
- **Bottle Holders** - when you want to keep your bottled water, juice or wine in a cool and convenient place.
- **Shelf Boards Pack** - two lightly frosted fresh blue boards make it easier to position smaller items of food in your fridge without losing them.
- **Medisafe Medicine Box** - to keep your medicine in a cool and safe place.

In the unlikely event that your Corner Fridge or Cold Room needs a part replacing, we offer a range of spare parts including:

- Filters
- Fridge Door Seals
- Refrigeration Units
- Hinges
- Ventilation Grilles

You can rest assured that we will have the spare parts to ensure that your Corner Fridge or Cold Room is kept in prime condition.

A New Wine Storage Experience

The Corner Fridge Company not only offers the Corner Fridge and the Cold Rooms, we also offer a range of integrated wine cabinets.

Whatever the size of your kitchen or your enthusiasm for wine, we will have an integrated wine cabinet to suit you. Our wine cabinets can be fully integrated into your kitchen, with the option of a glass door or furnished with a door to match your kitchen's design.

The Corner Fridge Company offers a wide range of integrated wine cabinets with a variety of features that defy convention including:

- 45 to 264 bottle capacity
- Door options include single door under counter versions, two door upright and side by side versions and doors in a variety of finishes
- Interior walls are pre-painted stainless steel to make them easy to clean, long lasting and robust
- Anti-UV doors to protect wines from the light
- High density polyurethane insulation to enable consistent temperature within the cabinet
- Cabinets with differing constant temperatures so you can keep different wine types in the same cabinet

JG45 Integrated Wine Cabinet

This wine cabinet is available with a black or stainless steel finish to suit your kitchen with a glass door. There are also mono or dual temperature options. This mono temperature version holds 45 bottles with four shelves. With the dual temperature option, there are five shelves with the bottles split between the two temperatures, 16 and 29 bottles respectively.

CI140 Integrated Wine Cabinet

The CI140 integrated wine cabinet comes with a solid door either in black or stainless steel finishes. This wine cabinet holds between 38 and 42 bottles depending on the shelves you choose. It comes in two widths; 580mm and 598mm so you can choose the one that best fits into your kitchen
