

Hanson Cement / Cape Industrial
Services
Hanson Glasgow Depot

Hanson is a leading supplier of heavy building materials to the construction industry, running 300 manufacturing sites and employing more than 3500 people in the UK.

Weatherproofing Advisors Ltd were appointed by Cape Industrial Services to carry out the replacement of the wall cladding at the Hanson Cement Distribution depot in Bellshill, near Glasgow.

As part of an overall refurbishment programme, our works involved the safe removal of the existing aged wall sheets, then the installation of a new profiled cladding system incorporating translucent panels.

New Hanson signage was installed as part of the cladding works.

Following a comprehensive survey of the entire building, a full schedule of works was prepared by Weatherproofing Advisors, which incorporated a detailed designed specification, access plans, and safe working methods.

The works were carried out whilst the distribution centre continued to operate at normal capacity.

Working together with the Cape / Hanson project team allowed us to carry out the full project with minimal disruption to the day-today operations.

The new wall cladding has improved the aesthetics of the building, providing a long term, minimal maintenance solution.

“Our key aim for this job was that we were looking for a safe contractor. This is the first time we have used WPA, so it was imperative that the job was done correctly and safely. The completed project looks good and the client has commented on his satisfaction with this”.
