## Cancellation Policy -

Please note, if a site visit is cancelled within 48 hours of an agreed date, a charge of £150 including VAT will be applied.

In order to achieve the required degree of accuracy, surveying can only take place if the base, walls and where appropriate the ceiling are in a finished condition, i.e. trays or tiled floor are in place and walls are fully tiled with suitable studwork in place in the wall to support the weight of the 10mm safety glass. We cannot make exceptions to this rule as experience has proved that making allowances for unfinished works will invariably lead to your shower screen not fitting.

In situations where the area is not ready as described above, a survey cannot take place and a charge of £150 including VAT will be applied.
