

CABINET SERVICE

For decades Space Engineering Services has been the market leader for innovative refrigeration solutions, designed to meet all sorts of customer challenges.

Our extensive refrigeration package for the food retail environment includes our turnkey refrigerated cabinet service. We have a highly experienced Cabinet Delivery team that manage the importation and installation of refrigerated cabinets, delicatessen and fresh food counters, and associated ancillary products across Europe.

THE COLLECTION

Working with a large supply chain of leading international manufacturers, we are able to offer an extensive range of energy efficient refrigerated cabinets that will keep your products cool and maximise the customer retail experience.

We have a cabinet for every requirement but we also we understand that no two customers are the same, which is why we also offer our bespoke cabinet service. Working closely with our customers we can design refrigerated cabinets to specification, creating a custom made product to meet your exact requirements.

Alternatively, we have a wide selection of "off the shelf" LT and HT, remote and integral equipment available in a choice of standard colours and sizes, for customers with less complex requirements. All of our products whether bespoke or "off the shelf" are compatible with any refrigerant type and any of Space Engineering Services' refrigeration plant - a truly turnkey solution.

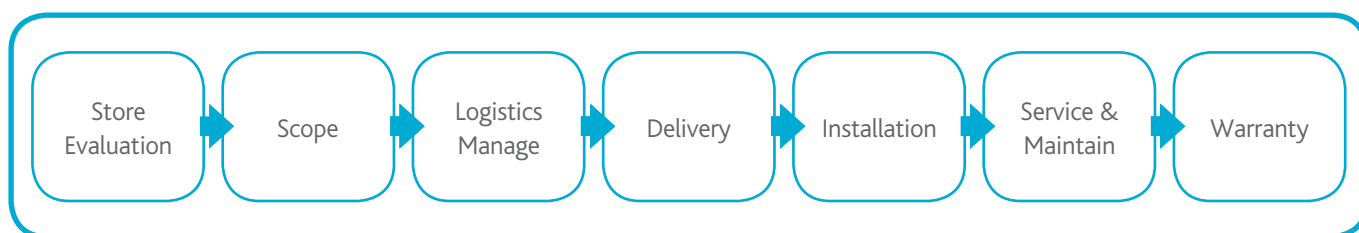

TURNKEY SERVICE

At Space Engineering Services we deliver a fully managed cabinet service, taking away the pain and complexity of importing from overseas, offering our customers peace of mind. Managing the entire supply chain process from start to finish, we provide our customers with a single point of contact and a one-stop, issue resolution service.

Our complete end to end, turnkey cabinet service includes:

- Scoping store specific requirements
- Designs developed using the latest design standards and software
- Order and pipeline management with the cabinet manufacturers
- Managed logistics and importation processes
- Pre-despatch and pre-delivery inspections
- Cabinet delivery to store in line with programme
- Installation of cabinets, independently or integrated into wider goods and services provision
- Service and maintenance of the cabinets
- Supply of spare parts and warranty services

Working with Space Engineering Services means customers can benefit from low cost manufacturing that delivers considerable cost savings, whilst still receiving the added value of a fully managed service.
