Presentation Guidelines

You will probably wish to prepare some PowerPoint slides to support your presentation. Prepare your slides as a PowerPoint file or a PDF and bring them with you to the conference. We recommend that you will bring your presentation on a portable memory device and will need to load your presentation onto the given computer before starting your session, to facilitate a smooth transition between speakers. You will not generally be able to plug your own laptop into the conference projection system. If you require special technology for your presentation please email *iait@sit.kmutt.ac.th* as soon as you can and we will do our best to help you.

Guidelines for Presentations
- The time allocated for a presentation is 15 minutes, with a further 5 minutes allowed for discussion.
- It is generally distracting to the audience to have too many slides in a short presentation
- Do not put too much text on a slide – you want the audience to listen to you and not to be reading your slides.
