

General Info

We value the patient-therapist relationship and offer an individualized program with the same physical therapist consistently providing care. Initial evaluations and follow-up treatment sessions are approximately 45 minutes in length. We respect patient privacy and offer private treatment rooms along with comfortable gym areas for patient care.

Office hours are generally 8am to 6pm Monday through Friday. For patients with conflicts around work schedules, early morning and late appointment times are available. We participate with most insurance plans and assist in verifying benefits.

The Right Choice

JACKSON COUNTY PHYSICAL THERAPY, LLC

Heal Your Body. Strengthen Your Life.™

Who are Physical Therapists?

Physical therapists are rehab specialists extensively trained in evaluating and treating problems involving the muscles, bones and nerves.

Why Physical Therapy?

The Early Choice

Early intervention is often the key to successful treatment. Many injuries are successfully treated with the proper physical therapy approach. Don't wait; early physical therapy works.

The Right Choice

Physical therapy is the right choice because it treats the problem rather than the symptom. Physical therapy is often times the least invasive type of treatment available.

Why Jackson County Physical Therapy (JCPT) ?

JCPT is owned by local physical therapists, each with over 20 years experience. Our offices are conveniently located in Ashland, Eagle Point, East Medford, Central Medford and Phoenix.

JCPT aspires to improve the quality of life of our patients by creating an environment that promotes wellness. We are committed to providing an experienced, caring staff dedicated to learning, teaching and personal development. We strive for a safe and confidential setting with unparalleled individualized care.
