

BLUE LINE SPINNAKER SERIES

CUSTOM CRUISING SPINNAKERS BY ULLMAN SAILS

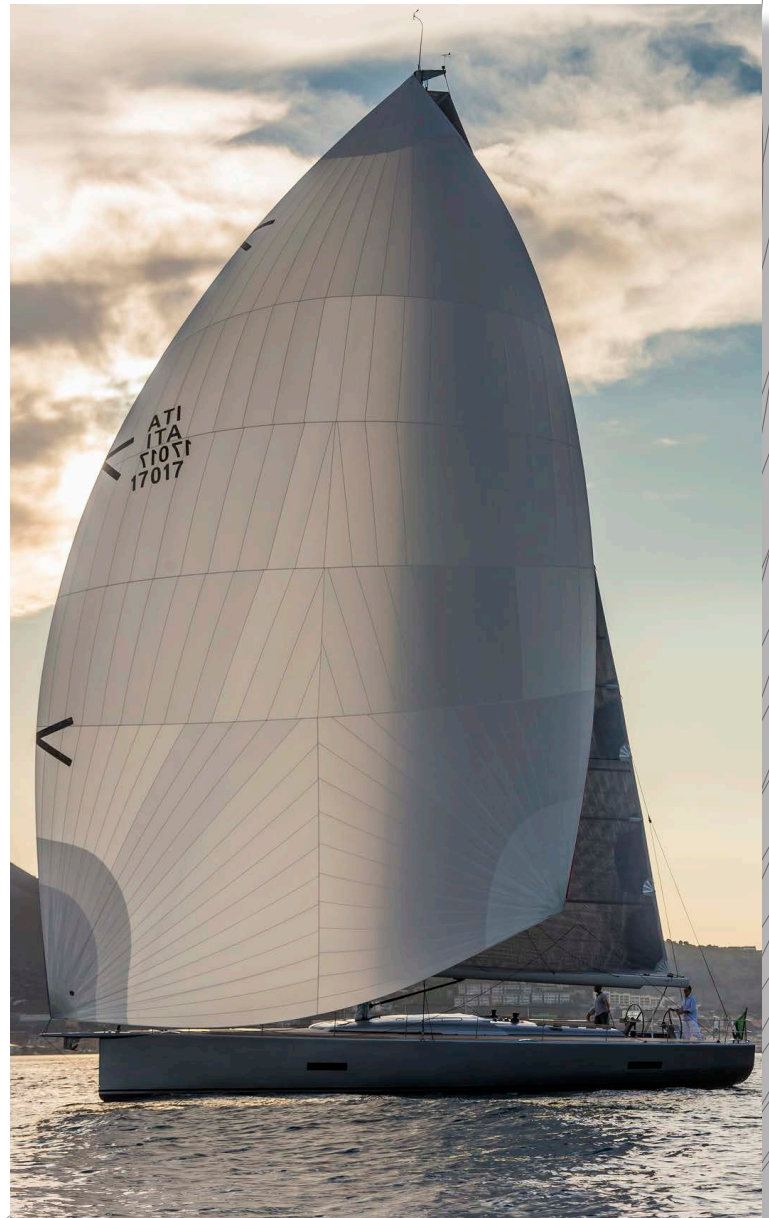

The Blue Line Spinnaker Series is the ultimate addition to your cruising inventory. Designed to be easy to trim in a wide variety of conditions, these sails add speed and performance to your adventures while keeping cruising safe, simple and enjoyable for everyone on board. We also offer systems such as spinnaker socks and top down furlers to make hoisting and dousing even easier.

Cruising AP Spinnaker

Our standard asymmetrical spinnakers are built at 165% so that they are large enough to get your boat moving, but sized to keep you in control. Most AP cruising spinnakers are made with 1.5 oz. nylon for strength and durability – the optimal choice for you to keep your spinnaker hoisted in a wide range of wind and weather conditions. Ullman Sails will work with you to choose the most appropriate cloth weight and sail size to match your cruising goals.

Cloth Selection and Construction

Our Blue Line Spinnakers are made with high-quality, brand-name nylon cruising cloth. This means your sail is softer and easier to handle than most racing spinnakers. We recommend using the slightly heavier 1.5 oz. nylon to ensure you have a durable sail that will last years on the water. Each sail is designed using a tri-radial panel layout and reinforced with triple-step stitching on the seams. Radial patches also make the sail stronger and help hold the performance shape longer.

Performance Cruising Spinnakers

Ullman Sails provides a variety of options for those seeking a more involved downwind cruising experience. Similar to the Red Line Spinnaker Series for racers, Ullman Sails offers symmetrical and asymmetrical cruising spinnakers designed for different ranges of apparent wind angles and wind strengths, including Cruising Code Zeros. Contact Ullman Sails to discuss the sail inventory options that best fit your needs.

Standard Specifications

- Radial construction
- Triple-step stitching on every seam
- Radial patches
- Nylon or Dacron leech tapes
- High-tenacity luff lines for larger sails
- Stainless steel rings

Available Upgrades

- Custom graphics
- Retriever patch

Sail Handling and Sail Accessories

Our sailmakers will customize your sail with the appropriate hardware and finishing details to fit your furling or other handling systems. We also provide or can assist with:

- Furling systems and installation
- Spinnaker sleeves/socks
- Spinnaker tackers
