YOUR RESOURCE FOR SUCCESS

Welcome to the 2016 Synergy Lighting Catalogue

Here at Synergy, we have been serving the electrical industry since 1985. Over the years, we have built up a wealth of resource in terms of knowledge, logistics, intelligence, technology and collateral.

It is our pleasure to share that resource with our clients to ensure that they succeed. Whether it's our innovative LED product range, or our insistence on reliable deliveries, we are passionate about exceeding customer expectations every time... truly your resource for success!

"...we like the level of your service and your reliability"
Mrs E – Accounts

Mission Statement

Deliver quality solutions to our customers providing what they need when they need it, supported by technical expertise and unbeatable customer service.

Vision Statement

A highly organised and efficiently run team that provides fulfilling employment and resource for the business owners, employees and the wider community.

WHY USE SYNERGY FOR YOUR LIGHTING PROJECTS?

We Understand Your Needs

In the team here at Synergy we have first hand on-site experience so we see the challenges you are facing – that's how we identify your requirements so well.

Increase Your Profit

We recognise that the lighting products on any project can be a significant part of the clients budget. It is therefore essential that they must be exceptional value for money to enable you to win the projects and manage them profitably. We strive towards this end so that we can help you save time and money on every installation.

Continuity Of Supply

We realise that once you've quoted your client, you'll need to be able to service that commitment when you get the order, maybe months later, so that's why we have a sustainable sourcing policy here at Synergy.

Insist On Quality

From our knowledge of the industry we know that a return visit to site, even for a small issue, costs you money and erodes your profit margin – quality really matters.

Design Support

We know that to support your tender and quotation submissions to your clients you will require evidence that your offering is the right one for them. We can help you on the lighting designs, lighting design files, specification sheets and images – we have confidence in our products and we can prove it!

Fast-Track Delivery Service

We're all aware that once the project starts there's no stopping, which is where our fast-track delivery service comes in. We make your deadlines our deadlines!

Exceeding customer expectations every time... truly your resource for success!

YOUR RESOURCE FOR SUCCESS

Ordering From Synergy

HOW TO ORDER

Here at Synergy we accept orders placed by phone, fax or email. To place an order call **0845 381 0845**, email sales@synergy.gb.net or fax to **0845 381 1000**.

NEXT DAY DELIVERY

All stock items for orders received before 3pm will be despatched for delivery the following day. Call us about other delivery options.

CREDIT ACCOUNT

To open a 30 day account email Synergy at sales@synergy.gb.net. We aim to process every credit account request within 24 hours.

CALL AND COLLECT SERVICE

If you wish to collect goods from our Hoddesdon collection point, simply place your order 30 minutes beforehand, and it is our aim to have your order picked, checked, packed and ready for you on your arrival.

Terms of Business

- We reserve the right to change details or product specification without prior notice.
- All products are subject to availability. Errors and omissions excepted.
- All goods and conditions of sale are subject to our 'standard conditions of sale', a copy of which is available upon request.
- Items returned for credit must be unused, in original packaging and returned carriage paid within 28 days of delivery. Return of specially ordered items is subject to manufacturer's acceptance.

"...I have heard good things about Synergy!"
Mr G - Electrician

EXPEDITE

PRE-WIRING SERVICE

Use Synergy's EXPEDITE PRE-WIRING SERVICE to supply luminaires pre-wired and tested.

We work closely with your project management team to source, connect and test the appropriate lead and plug and deliver according to your site-specific programme.

CASE STUDY MARCH 2014

Luminaires	256 no. 40W Sigmalux LED panels
Emergencies	43 no. maintained emergency versions
LCM type	CP Electronics Vitesse modular system
Time saving	42 hours estimated time saved on site
Cost saving	£1280 estimated saving

Call **Synergy** now on **0845 381 0845** or email sales@synergy.gb.net

EXPEDITE

PRE-WIRING SERVICE

7 Reasons to use Synergy's Expedite

INCREASE YOUR PROFIT

The most cost-effective way to wire leads to luminaires is in a factory controlled environment. That's why we are able to offer significant savings and profit improvements with our EXPEDITE system.

SAVE TIME ON SITE

Once each luminaire is fully wired, checked, tested, packed and delivered to your site, all that remains is to unpack the luminaire, place into position and apply any site-specific fixings.

DE-SKILL THE INSTALLATION PROCESS

Often, this is a simple process that does not involve any wiring at all, and therefore the entire installation process is de-skilled.

INCREASE PRODUCTIVITY

This process involves a large workload shift from site to factory which in turn enables significant increase in site productivity.

REDUCE MANAGEMENT TIME

With much of the difficulty removed from the installation method, the next benefit is that less input is required by management staff to get the job done competently and quickly.

HEALTH AND SAFETY

And it's not just the workload that shifts from site to factory; high level working is also reduced, meaning that installing luminaires is made even safer.

REDUCE RISK

Last but not least, due to the process occurring in a controlled environment, the bulk of the installation cost can be calculated accurately and built into project costings well in advance of site commencement. This means that risks associated with the cost of defective labour can be eliminated from this part of the installation process.

"The labour saving on the installation was considerable compared to previous installations wired on site, with zero connection problems on power-up"

Mr R - Lighting Project Manager

Eight great reasons why many of our luminaires use Tridonic control gear...

Why use Tridonic?

1

5 Year warranty on most components

2

Over 650 inventions and more than 2,100 patents

3

Global presence in 73 countries with 30 sales offices or partners

4

UK technical support office and back-up

5

1,970 Employees

6

Established since 1956

7

New products account for more than 52 % of portfolio

8

Fast-track R+D department with over 300 employees keeps apace with developments in the LED market

“ At Tridonic there is never any unfinished business. Or unsolved problems. We devote all our energy to your light. ”

www.tridonic.com

For our complete product range visit www.synergy.gb.net

Emergency Lighting Systems Explained

Different types of emergency lighting are often confused...

Maintained

The luminaire works in exactly the same way as a standard mains version, except when the power fails, it switches to battery powered emergency output.

Non-Maintained

The luminaire only comes on in the event of a power failure as an emergency light source. The continual mains supply is only used to charge the battery.

Sustained

This is where a lamp separate to the main lamp provides the emergency light source. The purpose here is to minimise any possibility of emergency lamp failure, as the 'sustained' lamp is only used in emergency mode. This will only be relevant on a maintained emergency luminaire.

DALI Emergency

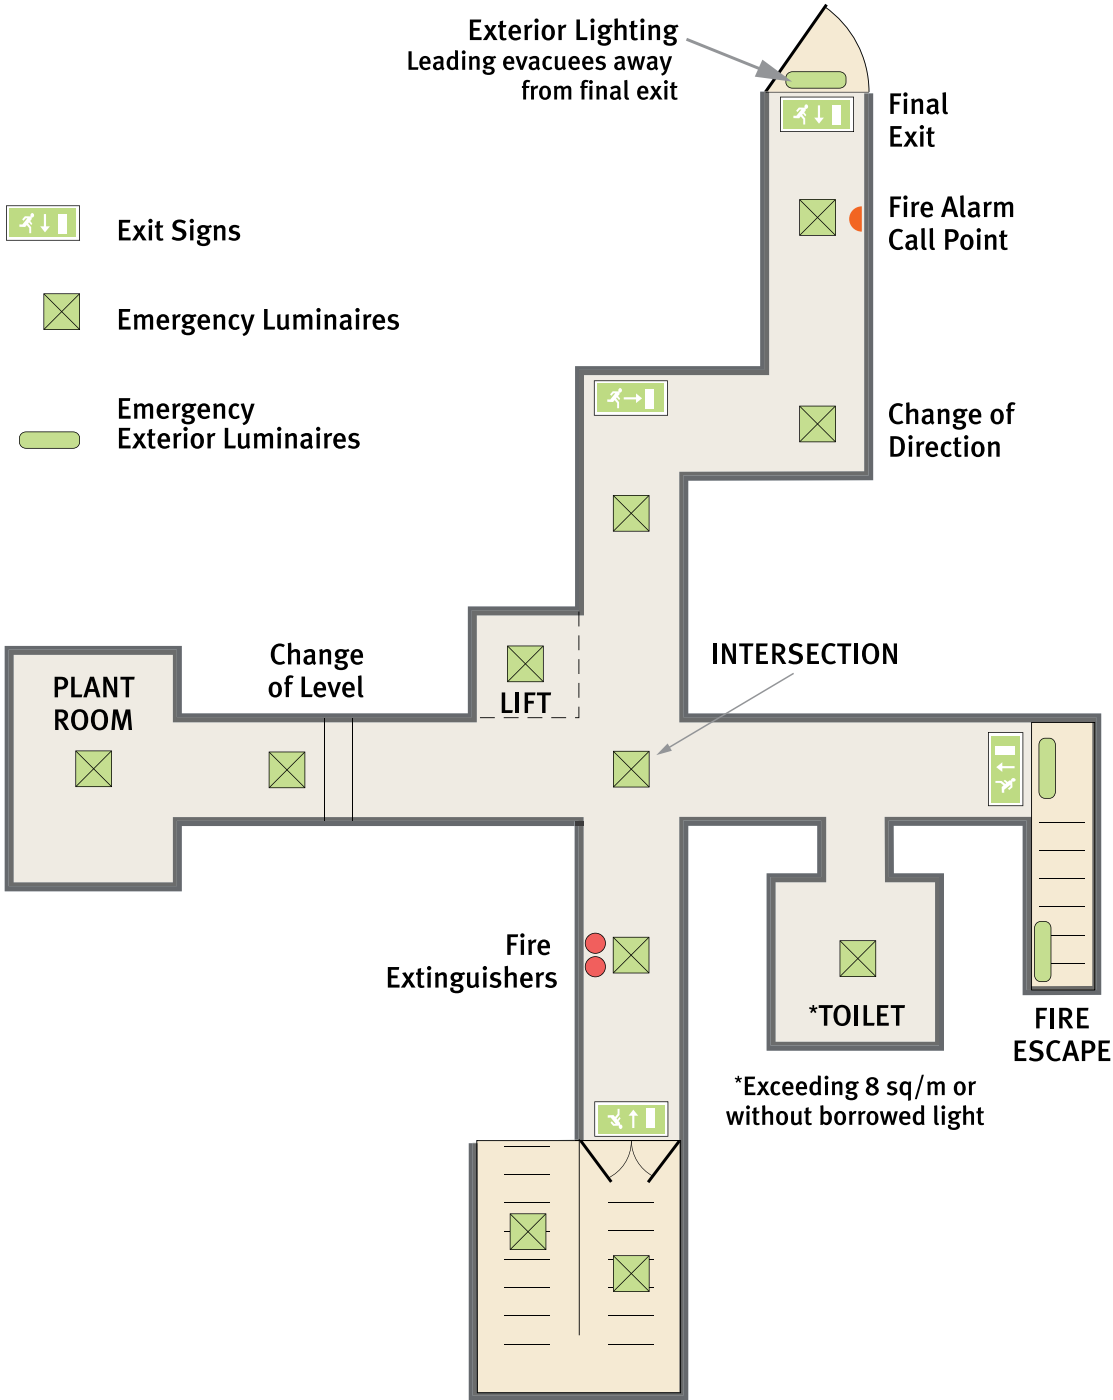

We can also offer the option of DALI-Emergency controlled luminaires, utilising Tridonic or Mackwell DALI Emergency gear. This system allows greater control and detailed monitoring and reporting of emergency lighting. We can include this technology in our range of lighting or as a conversion service to other luminaires.

Central Battery

This is where the battery power for emergency lighting is situated at one, central point and fed to all relevant luminaires in the event of a power failure, whether they are maintained or non-maintained. All emergency luminaires will have a charge healthy LED indicator, which shows that the battery is being charged while there is a mains feed. When the power fails, the LED will switch off and the lamp will be illuminated by the battery.

Light Level Guidance

The CIBSE (Chartered Institute of Building Services Engineers) produces a Code for Interior Lighting which gives lighting requirements for areas.

This is also replicated in BS EN 12464-1:2002 Light and lighting - Lighting of work places - Part 1: Indoor work places

Light Levels Appropriate To Various Tasks And Areas

Illuminance (lux)	Activity	Area
100	Casual seeing	Corridors, changing rooms, stores
150	Some perception of detail	Loading bays, switch rooms, plant rooms
200	Continuously occupied	Foyers, entrance halls, dining rooms
300	Visual tasks moderately easy	Libraries, sports halls, lecture theatres
500	Visual tasks moderately difficult	General offices, kitchens, laboratories, retail shops
750	Visual tasks difficult	Drawing offices, meat inspection, chain stores
1000	Visual tasks very difficult	General inspection, electronic assembly, paintwork, supermarkets
1500	Visual tasks extremely difficult	Fine work and inspection, precision assembly
2000	Visual tasks exceptionally difficult	Assembly of minute items, finished fabric inspection

Light Levels Appropriate To Specific Building Type

Extracts from CIBSE Code for Lighting Part 2 (2002)

Offices

Illuminance (lux)	Area
300	Filing, copying etc.
500	Writing, typing, reading, data processing
750	Technical drawing
500	CAD workstations
500	Conference and meeting rooms
300	Reception desk
200	Archives

Healthcare - Wards

Illuminance (lux)	Area
100	General lighting
300	Reading lighting
300	Simple examinations
1000	Examination and treatment

Residential

Illuminance (lux)	Area
100 - 300	Lounge
150 - 300	Kitchens
150	Bathrooms
100	Toilets

Educational

Illuminance (lux)	Area
300	Classrooms
750	Technical drawing room
300	Computer practice rooms

Hotels and Restaurants

Illuminance (lux)	Area
500	Kitchen
-	Restaurant, dining room, function room
200	Self service restaurant
500	Conference rooms

Retail Premise

Illuminance (lux)	Area
300	Sales area
500	Till area
500	Wrapper table

Lighting Jargon Explained

BREEAM Rating

Building Research Establishment's Energy Assessment Method

An environmental rating system that sets the standard for best practice in assessing how sustainable a building is. There are over 240,000 buildings certified with a BREEAM assessment rating since the scheme was launched in 1990. BREEAM uses established benchmarks to evaluate design, construction and operation and also encourages the use of low carbon, low impact design that minimises the energy demands on a building.

Candela

Cd

The SI unit of luminous intensity. One candela is the luminous intensity, in a given direction, of a source that emits monochromatic radiation of frequency 540×10^{12} Hz and that has a radiant intensity in that direction of 1/683 watt per steradian.

CRI

Colour Rendering Index

The measurement of the ability of a light source to reproduce the colour's vibrancy accurately compared to natural light. A lamp with low CRI will distort the appearance of colours, and make them appear 'dull'. The index ranges from 0 to 100 the best being 80 and above. A light's CRI can only be compared to another light if they have the same colour temperature (explanation below). High CRI light sources should be used where it is important to render colours well.

CCT

Correlated colour temperature

Whether a light source appears 'cool' or 'warm' in colour. Colour temperature is measured in degrees Kelvin (°K). Light sources with a warm appearance are more 'orange', have a CCT of 2700-3000K, and are considered appropriate for domestic settings. Cool white (or Neutral) sources have a CCT of 4000K. Sources of around 6000K-6500K are termed 'daylight' in colour. Very cool temperatures of 6000K plus can start to look almost blue-white.

COB

Chip on Board

A technology of LED packaging for LED light. When multi LED chips are packaged together as one lighting module and lit up they seem to look like a single LED.

DALI

Digital Addressable Lighting Interface

A protocol for lighting controls and dimming agreed by the technical standard IEC 62386 and agreed on by most major manufacturers. DALI-compliant components (ballasts, drivers sensors, controllers, switches, etc.) from different manufacturers can be controlled together within the same installation. With DALI, design and user flexibility are dramatically improved compared with non-dali systems.

This information is provided for guidance purposes only, and it is the responsibility of the user to verify the accuracy of this information before using it within any design. Synergy cannot be held liable in any way where this information is used within a design of any sort

Illuminance

The luminous flux incident on unit area of a surface. It is measured in lux

kWh**Kilowatt-hour**

A unit of energy equal to 1,000 Watt-hours. So what a 1,000 Watt appliance would use in one hour, or what a 1W appliance would use in 1,000 hours. Electricity bills use Kilowatt-hours to calculate the applicable charge.

Luminous efficacy**Efficacy = Lumen / Watts**

How effective a light source is at converting its input power into light output. The efficacy is measured in lumens produced divided by the power input (Watts), and is the ratio of luminous flux to power.

Luminous Flux

The amount of light flowing from a light source, and is measured in Lumens.

Lumen

The unit used to measure how bright a light source is. The higher the lumen output, the brighter the light source.

Uniformity

Shows how even the lighting and is the relationship between the lowest lux level and the highest lux level in a given room or area. Shown as a percentage, this relates to both light intensity and luminance.

LOR**Light Output Ratio**

The percentage of light emitted from a light source that actually leaves the luminaire and enters the lit environment. An LOR of 70 means 30 per cent of the light from lamp is lost inside the reflector and light fitting. Also known as DLOR (Downward Light Output Ratio).

Luminance

Defined as the amount of light reflected from a point or surface in a specific direction and measured in candela per metre².

Luminous Intensity

The intensity of light in a given direction, defined as a lumen value per solid angle. The unit of measurement is the Candela.

Lux

The SI unit of illuminance, equal to one lumen per square metre.

PIR**Passive Infrared**

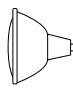

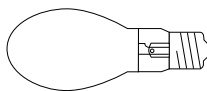

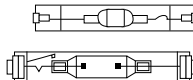

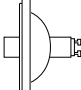

A PIR sensor is an electronic sensor that measures infrared (IR) light that radiates from objects within its field of view. It can detect heat from objects that is undetectable by humans. The use of PIR sensors are the foremost technology used for presence and absence detection, so that lights turn on and off dependent on whether there are people there or not.

Learning Centre

Luminaire: Zeta Continuous

Dimming Systems Explained

It's important to understand the differences between different dimming conventions in order to correctly specify any dimming installation.

DALI

Digitally Addressable Lighting Interface

DALI is a recognised standard employed by all ballast manufacturers that offer DALI ballasts. This system assigns an individual address to each luminaire i.e. 001, 002, 003 and so on, allowing individual control of each luminaire.

All luminaires can be controlled from a central desktop PC, and can be manually over-riden at a wall switch, or can be used in conjunction with a daylight or occupancy sensor.

DALI can offer a two way communication between the luminaire and the PC which provides valuable information and reports such as operating status of individual luminaires. In addition to the normal mains wiring, each DALI driver or ballast needs to be connected via a bus pair, which is normally an extra low voltage cable run to every luminaire and control point in the system.

DSI

Digital Series Interface

DSI is a more controllable version of digital dimming. This enables the user to group luminaires, operate daylight linked dimming and other controllable options. DSI is a Tridonic name, and can be set up with a variety of control options and controllers, some offered by other manufacturers designed purely to work with the DSI ballast. DSI ensures that there are no issues with interference from the switching and the dimming of the luminaire which can affect switch on. DSI is wired using a dimming pair, run around to each luminaire in the circuit.

Sample connection diagram for a DALI or DSI ballast or driver:

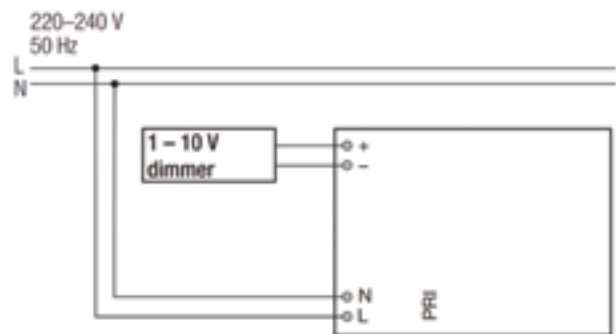

This information is provided for guidance purposes only, and it is the responsibility of the user to verify the accuracy of this information before using it within any design. Synergy cannot be held liable in any way where this information is used within a design of any sort

Analogue Dimming

Analogue dimming is also known as 1-10v dimming. This is because the ballast produces a 1-10v DC supply that can be increased or decreased by a remote potentiometer, which can be either rotary or a slider control. This DC supply can be increased or decreased by the switch to affect the resistance and hence the amount that the lamp is dimmed. Analogue dimming also requires a separate dimming pair to be run from the potentiometer to each luminaire in the circuit.

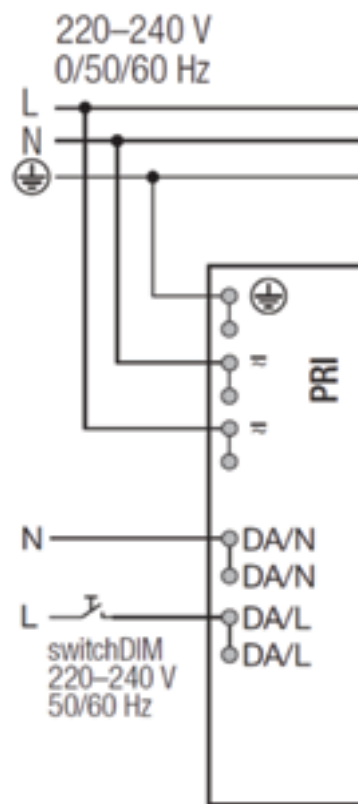

Sample connection diagram for a 1-10V system:

Switch Dim/Touch Dim

This is the simplest option for digital dimming and is operated via a 'push to make' or retractive switch, which is then wired to each luminaire in the circuit via a 4 core cable consisting of switched live, neutral, earth and permanent live. The switch controls the switching on and off of the luminaire, and also the dimming. When the switch is pressed and held it will dim down. Another press and hold will dim back up. A momentary push will switch off and also bring back on. There are no issues with interference from the switching and the dimming of the luminaire which can affect switch on.

Sample connection diagram for a Switch-Dim system:

This information is provided for guidance purposes only, and it is the responsibility of the user to verify the accuracy of this information before using it within any design. Synergy cannot be held liable in any way where this information is used within a design of any sort

IP Rating Information

As an international standard, IP Ratings describe the environmental protection that a product has from particles and liquids. Each IP rating consists of two numbers: the first refers to 'particulate' protection and the second to 'liquids, as follows

	1st Digit Protection of ingress of solids	2nd Digit Protection of ingress of liquids
0	No protection	No protection
1	Protected against solid objects over 50mm (e.g. hands, large tools)	Protected against vertically falling drops of water
2	protected against solid objects over 12mm (e.g. fingers, large tools)	Protected against direct sprays of water up to 15 degrees from vertical
3	Protected against solid objects over 2.5mm (e.g. wire, small tools)	Protected against direct sprays of water up to 60 degrees from vertical
4	Protected against solid objects over 1mm (e.g. wires)	Protected from direct sprays of water from any direction, limited ingress permitted
5	Limited ingress against dust ingress	Protected against water jets from any direction, limited ingress permitted
6	Total protection against dust ingress	Protected against high pressure water jets from any direction, limited ingress permitted
7	-	Protected against full immersion between 15cm and 1 metre in depth
8	-	Protected against long periods of full immersion under pressure

This information is provided for guidance purposes only, and it is the responsibility of the user to verify the accuracy of this information before using it within any design. Synergy cannot be held liable in any way where this information is used within a design of any sort

Warranty Statement

1. Synergy warrants all fixtures and luminaires supplied to be free from material defects and defective workmanship during the specified warranty period.
2. At the discretion of Synergy, faulty products that are returned in accordance with the terms of this warranty will be repaired or replaced and returned to our customer free of charge.
3. The warranty period commences on date of invoice and is dependent on the individual type and specification of the product as follows:
 - 3.1. Fluorescent Luminaires - 1 year
 - 3.2. Metal Halide Luminaires - 1 year
 - 3.3. LED Emergency Luminaires - 3 years (1 year on batteries)
 - 3.4. LED Luminaires - Standard LED Warranty - 3 years
 - 3.5. LED Luminaires - 5 Year LED Warranty - 5 years
(Note: The Synergy 5 year LED warranty is indicated by the 5 year warranty icon on the individual product specification sheet.
If this icon is not present, the warranty is a standard 3 year warranty)
 - 3.6. All other products - 1 year
4. The warranty is offered exclusively to the original purchaser of the luminaire and is subject to the correct installation, operation, testing and maintenance of the product in accordance with associated literature, current legislation and design intentions.
5. In no event shall Synergy be liable for any loss of profits, business, revenue, anticipated savings, special indirect or consequential losses caused by a failed product, even if foreseeable by or in the contemplation of the company.
6. All warranty claims must be logged and products returned (at customer's cost) to our customer service department within 30 days of the manifestation of a perceived fault along with proof of purchase. Synergy shall not be liable for any cost of removal or reinstallation pertaining to the defective product and such cost, if any, shall be borne exclusively by the purchaser.
7. The validity of this warranty may be affected if a customer account is trading outside our terms and conditions of sale.
8. All claims for product damage must be reported to our Customer Service department within 24 hours of delivery and the delivery must be signed for as damaged on the Proof of Delivery. Lamps are only covered for damage reported in accordance with this condition.
9. Excluded from the warranty are defects due to accidental damage, misuse, misapplication, storage damage, negligence and acts of God. Warranty is void if any modifications to the product are made or warranty seals broken. Synergy does not warrant that any goods supplied are fit for purpose
10. The warranty period is based on a burning period of 4,000 hours per year and adequate records of operating/testing history must be kept available for inspection. Relative humidity, ambient temperature and ingress protection values must not be exceeded.
11. LED product will only be considered defective for the purposes of this warranty if it fails to emit 70% or more of its specified lumen output value and/or more than 10% of the individual LEDs comprised in that product fail to emit any light at all.
12. Synergy reserves the right to make the final decision on the validity of any claim.

Statutory warranty

Statutory warranty claims are unaffected by this guarantee and shall apply independently and in parallel.

Synergy Terms of Trading

1 Business customers and consumers

- 1.1 Some of these terms apply to consumers only; some apply to business customers only. Those terms are marked as such.
- 1.2 All other terms apply to all customers.
- 1.3 You are classified as a business customer if you indicate to us that the goods supplied by us will be used in the course of your business or if you use the goods in the course of your business.
- 1.4 If you are not a business customer, you are a consumer. You have certain statutory rights as a consumer, which are not affected by these terms. Contact your local trading standards office for more information. Words in italic type are legal words which clarify, rather than alter, the meaning of the relevant clause.

2 Price

- 2.1 The price quoted excludes VAT (unless otherwise stated). VAT will be charged at the rate applying at the time of delivery.
- 2.2 Our quotations lapse after 30 days (unless otherwise stated).
- 2.3 The price quoted excludes delivery (unless otherwise stated).
- 2.4 **Business customers only:** unless otherwise stated, the price quoted to business customers is an illustrative estimate only and the price charged will be our price current at the time of delivery.
- 2.5 **Business customers only:** rates of tax and duties on the goods will be those applying at the time of delivery.
- 2.6 **Business customers only:** at any time before delivery we may adjust the price to reflect any increase in our costs of supplying the goods.

3 Delivery

- 3.1 All delivery times quoted are estimates only.
- 3.2 If we fail to deliver within a reasonable time after the quoted delivery time, you may (by informing us in writing) cancel the contract, however:
 - 3.2.1 you may not cancel if we receive your notice after the goods have been dispatched; and
 - 3.2.2 if you cancel the contract, you can have no further claim against us under that contract.
- 3.3 If you accept delivery of the goods after the estimated delivery time, it will be on the basis that you have no claim against us for delay (including indirect or consequential loss, or increase in the price of the goods).
- 3.4 We may deliver the goods in instalments. Each instalment is treated as a separate contract.
- 3.5 We may decline to deliver if:
 - 3.5.1 we believe that it would be unsafe, unlawful or unreasonably difficult to do so; or
 - 3.5.2 the premises (or the access to them) are unsuitable for our vehicle.

4 Risk

- 4.1 The goods are at your risk from the time of delivery.
- 4.2 Delivery takes place either:
 - 4.2.1 at our premises (if you are collecting them or arranging carriage); or
 - 4.2.2 at your premises or address specified by you (if we are arranging carriage).
- 4.3 You must inspect the goods on delivery. If any goods are damaged or not delivered, you must write to tell us within five days of delivery or the expected delivery time. You must give us (and any carrier) a fair chance to inspect the damaged goods.

5 Stated Quantities / Durations

- 5.1 Some items sold by the Supplier are sold by weight based upon the Supplier's experience and knowledge that those items when sold by weight will equal a certain quantity. In cases where a Purchaser orders a quantity of such items which are sold by weight the Supplier gives no guarantee or warranty that the precise number of items will be supplied.
- 5.2 Many products are supplied to the Supplier by manufacturers in boxed quantities. The Supplier gives no guarantee of warranty that such quantities are accurate and accepts no responsibility for any discrepancies. Any box quantities stated are approximate and may change without notice.
- 5.3 The manufacturers of many lamp products sold by the Supplier quote a lamp life duration. The Supplier gives no guarantee of this lamp life duration.

6 Payment terms

- 6.1 You are to pay us in cash or in cleared funds on or prior to delivery, unless you have an approved credit account.
- 6.2 **Business customers only:** If you have an approved credit account, payment is due no later than 30 days after the end of the month in which the invoice is raised, unless otherwise agreed in writing.
- 6.3 If you fail to pay us in full on the due date we may:
 - 6.3.1 suspend or cancel future deliveries;
 - 6.3.2 cancel any discount offered to you;
 - 6.3.3 **Business customers only:** charge you interest at the rate set under s.6 of the Late Payment of Commercial Debts (Interest) Act 1998;
 - a. calculated (on a daily basis) from the date of our invoice until payment;
 - b. before and after any judgment (unless a court orders otherwise);
 - 6.3.4 Consumers only: charge you interest at a rate equivalent to the rate set for business debts under s.6 of the Late Payment of Commercial Debts (Interest) Act 1998;
 - 6.3.5 claim fixed sum compensation from you under s.5A of that Act to cover our credit control overhead costs; and
 - 6.3.6 recover (under clause 5.8) the cost of taking legal action to make you pay.
- 6.4 If you have an approved credit account we may withdraw it or reduce your credit limit or bring forward your due date for payment. We may take any of these actions at any time and without notice.
- 6.5 **Business Customers only:** you do not have the right to set off any money you may claim from us against anything you may owe us.
- 6.6 **Consumers only:** you may only set off money you claim from us against money you owe us with our written agreement and on such terms as we may state.
- 6.7 While you owe money to us, we have a right to keep any property we may hold of yours until you have paid us in full (a lien).
- 6.8 You are to indemnify us in full and hold us harmless from all expenses and liabilities we may incur (directly or indirectly and including finance costs, legal costs on a full indemnity basis and the costs of instructing a debt collection agency to recover a debt due to us if any) following any breach by you of any of your obligations under these terms.
- 6.9 **Consumers only:** clause 5.8 means that you are liable to us for losses we incur because you do not comply with these terms. We may claim those losses from you at any time and if we have to take legal action we will ask the court to make you pay our legal costs.

7 Title

- 7.1 **Consumers only:** your statutory rights are unaffected.
- 7.2 **Business customers only:** until you pay all debts you may owe us:
 - 7.2.1 all goods supplied by us remain our property;
 - 7.2.2 you must store them so that they are clearly identifiable as our property;
 - 7.2.3 you must insure them (against the risks for which a prudent owner would insure them) and hold the policy on trust for us;
 - 7.2.4 you may use those goods and sell them in the ordinary course of your business, but not if:
 - a. we revoke that right (by informing you in writing); or
 - b. you become insolvent.
- 7.3 **Business customers only:** you must inform us (in writing) immediately if you become insolvent.
- 7.4 **Business customers only:** if your right to use and sell the goods ends you must allow us to remove the goods.
- 7.5 **Business customers only:** we have your permission to enter any premises where the goods may be stored:
 - 7.5.1 at any time, to inspect them; and
 - 7.5.2 after your right to use and sell them has ended, to remove them, using reasonable force if necessary.
- 7.6 Despite our retention of title to the goods, we have the right to take legal proceedings to recover the price of goods supplied should you not pay us by the due date.
- 7.7 You are not our agent. You have no authority to make any contract on our behalf or in our name.

Synergy Terms of Trading

8 Warranties

- 8.1 We warrant that the goods:
- 8.1.1 Comply with their description on our acknowledgement of order form; and
- 8.1.2 Are free from material defect at the time of delivery (as long as you comply with clause 7.4).
- 8.2 Business customers only:** we give no other warranty (and exclude any warranty, term or condition that would otherwise be implied) as to the quality of the goods or their fitness for any purpose.
- 8.3 Consumers only:** the warranty in clause 7.1 is in addition to your statutory rights and the following limitations of liability are subject to such statutory rights.
- 8.4 If you believe that we have delivered goods which are defective in material or workmanship, you must:
- 8.4.1 inform us (in writing), with full details, as soon as possible; and
- 8.4.2 allow us to investigate (we may need access to your premises and product samples).
- 8.5 If the goods are found to be defective in material or workmanship (following our investigations), and you have complied with those conditions (in clause 7.4) in full, we will (at our option) repair the goods, replace the goods or refund the price.
- 8.6 We are not liable for any other loss or damage arising from the contract or the supply of goods or their use, even if we are negligent, including (as examples only);
- 8.6.1 direct financial loss, loss of profits or loss of use; and
- 8.6.2 indirect or consequential loss
- 8.7 Our total liability to you (from one single cause) for damage to property caused by our negligence is limited to £5,000,000.
- 8.8 For all other liabilities not referred to elsewhere in these terms our liability is limited in damages to the price of the goods.
- 8.9 Nothing in these terms restricts or limits our liability for death or personal injury resulting from negligence.
- 8.10 Nothing in these terms affects or limits our liability for fraudulent misrepresentation.

9 Specification

- 9.1 If we prepare the goods in accordance with your specifications or instructions you must ensure that:
- 9.1.1 the specifications or instructions are accurate;
- 9.1.2 goods prepared in accordance with those specifications or instructions will be fit for the purpose for which you intend to use them; and
- 9.1.3 your specifications or instructions will not result in the infringement of any intellectual property rights of a third party, or in the breach of any applicable law or regulation.
- 9.2 Business Customers only:** We reserve the right;
- 9.2.1 to make any changes in the specifications of our goods that are necessary to ensure they conform to any applicable safety or statutory requirements; and
- 9.2.2 to make without notice any minor modifications in our specifications we think necessary or desirable.

10 Return of goods

- 10.1 We will accept the return of goods from you only:
- 10.1.1 by our prior agreement (confirmed in writing);
- 10.1.2 on payment of an agreed handling charge, any such charge being at our discretion (unless the goods were defective when delivered) and;
- 10.1.3 where the goods are as fit for sale on their return as they were on delivery.

11 Cancellation

- 11.1 You may not cancel the order unless we agree in writing (and clauses 3.2.2 and 11.2 then apply).
- 11.2 If the order is cancelled (for any reason) you are then to pay us for all stock (finished or unfinished) that we may then hold (or to which we are committed) for the order.
- 11.3 We may suspend or cancel the order, by written notice if:
- 11.3.1 you fail to pay us any money when due (under the order or otherwise);
- 11.3.2 you become insolvent;
- 11.3.3 you fail to honour your obligations under these terms.

12 Waiver and variations

- 12.1 No failure or delay by us in enforcing any of our rights shall constitute a waiver of any of our rights. No waiver shall be effective unless in writing signed by us.
- 12.2 No variation of these terms is binding unless:
- 12.2.1 made (or recorded) in writing;
- 12.2.2 signed on behalf of each party; and
- 12.2.3 expressly stating an intention to vary these terms.
- 12.3 All orders that you place with us will be on these terms (or any that we may issue to replace them). By placing an order with us, you are expressly waiving any terms you may have to the extent that they are inconsistent with our terms.

13 Force majeure- business customers only

- 13.1 If we are unable to perform our obligations to you (or able to perform them only at unreasonable cost) because of circumstances beyond our control, we may cancel or suspend any of our obligations to you, without liability.
- 13.2 Examples of those circumstances include act of God, accident, explosion, war, terrorism, fire, flood, transport delays, strikes and other industrial disputes and difficulty in obtaining supplies.

14 General

- 14.1 English law is applicable to any contract made under these terms. The English courts have non-exclusive jurisdiction.
- 14.2 If you are more than one person, each of you has joint and several obligations under these terms.
- 14.3 If any of these terms are unenforceable as drafted:
- 14.3.1 it will not affect the enforceability of any other of these terms; and
- 14.3.2 if it would be enforceable if amended, it will be treated as so amended.
- 14.4 We may treat you as insolvent if:
- 14.4.1 you are unable to pay your debts as they fall due; or
- 14.4.2 you (or any item of your property) become the subject of:
- any formal insolvency procedure (examples of which include receivership, liquidation, administration, voluntary arrangements (including a moratorium) or bankruptcy);
 - any application or proposal for any formal insolvency procedure; or
 - any application, procedure or proposal overseas with similar effect or purpose.
- 14.5 Business customers only:** All brochures, catalogues and other promotional materials are to be treated as illustrative only. Their contents form no part of any contract between us and you should not rely on them in entering into any contract with us.
- 14.6 Business customers only:** Any notice by either of us which is to be served under these terms may be served by leaving it at or by delivering it to (by first class post or by fax) the other's registered office or principal place of business. All such notices must be signed.
- 14.7 No contract will create any right enforceable (by virtue of the Contracts (Rights of Third Parties) Act 1999) by any person not identified as the buyer or seller.
- 14.8 The only statements upon which you may rely in making the contract with us, are those made in writing by someone who is our authorised representative and either:
- 14.8.1 contained in our estimate (or any covering letter) and not withdrawn before the contract is made; or
- 14.8.2 which expressly state that you may rely on them when entering into the contract.
- 14.9 Please note that we may transfer personal information about you to those that we may appoint to administer your account or recover amounts owing. That may include, for example, passing information about you to our insurers, debt recovery agents and solicitors, if you fail to pay us.
- 14.10 You may not assign your rights.
