

Drilling Risers

Experienced personnel provide full support to calculate and plan for space out requirements to meet with clients' drilling needs.

Claxton holds one of the largest Surface Drilling Riser stock inventory's in the UK, providing 7.1/16", 11", 13.5/8" and 21.1/4" Riser Assemblies.

In addition, our Riser system supply is complemented by the comprehensive inventory of Crossover adaptors, D.S.A Flanges, Lifting adaptors and bolting/gasket stocks — all of which are available for fast mobilisation.

Claxton provides

- Full range of Riser lengths held to accommodate any combination required
- Flanged ends; 7.1/16", 11", 13.5/8", 21.1/4"
- High-pressure ratings
- All systems fully maintained/certified ready for offshore use
- Full Q.A. data packs supplied
- D.S.A Flanges, Crossover Adaptors and connectors to suit
- Offshore bolt torquing service

Riser Analysis, Design & Manufacture

Claxton offers a full riser analysis, design and manufacture service, by working with Acteon group sister companies, 2H Offshore and SRP.

In addition, clients' stock equipment can be modified to full SI289 Specification to provide a suitable riser configuration. Claxton is also able to offer short lead times on various pipe materials, providing quality products on excellent delivery schedules.
