Print and Mail Rendering Services

PRINT & MAIL SERVICES

NDS works with state-of-the-art laser printers and high volume stuffing and folding equipment so when the printing is done your pieces hit the mail. NDS adheres to U.S. Post Office barcoding and sorting so that we achieve most favorable postal rates, which in turn makes your costs less.

GREEN TECHNOLOGY

NDS is not only concerned about our performance for you, but we are also concerned about what we do as it relates to the environment.

TURNKEY FORMS

NDS produces great looking forms and makes the process of purchasing a form convenient for our customers. NDS utilizes cutting edge technology for designing forms, which allows NDS to design and produce a Form proof in the same day.

- NDS receives files electronically from our customers and laser prints tax bills, statements, invoices and many other forms.

- NDS offers an electronic forms management system that remembers what you buy, how much you use, and when NDS should contact you to reorder.

- NDS features ECO Elegance recycled papers that look and perform as well as virgin papers. Recycled paper conserves valuable forest resources and does not take additional space in landfill sites.

Excellence for Your Business

You have worked hard to develop your organization's image. Color, logos, artwork and presentation, it's all part of what you are in your customers' eyes. Let's face it, for many of your customers it may be the only consistent contact they have with your organization. If your forms are not printing correctly or are hard to read and understand you can quickly damage the confidence you have worked so hard to foster with your customers. At NDS we understand your relationship with your customers and have always recognized that excellent customer service coupled with single source responsibility for all aspects of the computer system are the key ingredients to being successful. That's why we have always offered a forms and supplies service and been a single source supplier for our customers computer needs.

Single Source Responsibility

There's no question that there are many forms companies doing business today. However, there are few forms companies who are also in the computer systems business. NDS forms are designed to fit your unique situation. We fine tune and customize the design until it's the way you want it. Our customer service professionals work alongside the NDS software development team from concept to output to insure that your forms work right the first time.
