EASYCUT WINDOWBOARD

Ideal for Conservatories

POLYBOARD EasyCut is a cost effective, quality laminated windowboard made from tried and tested materials.

Tough melamine laminate is bonded onto a V100 moisture resistant core using a state of the art adhesive system.

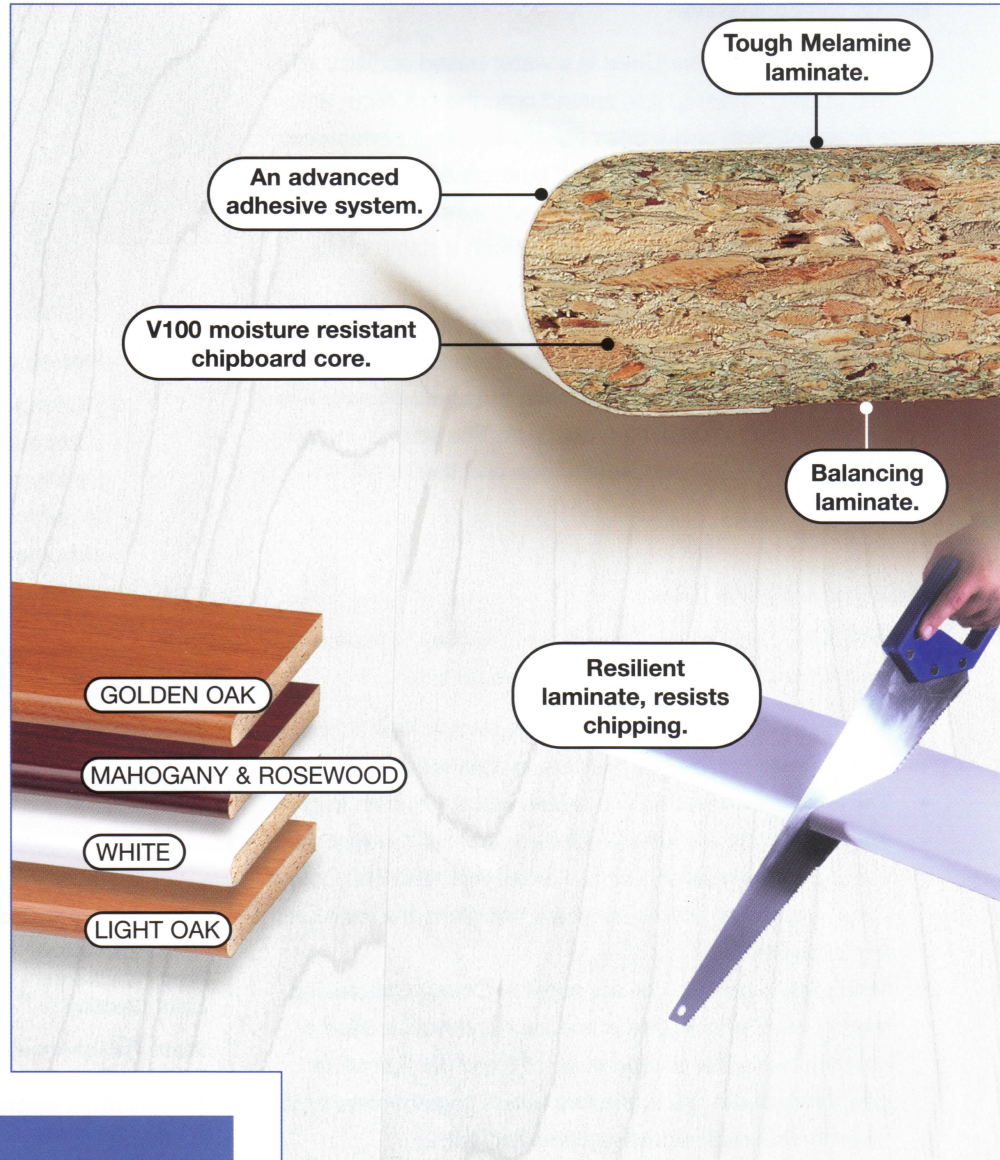

The combination of the specially developed laminate and adhesive gives EasyCut exceptional cutting properties.

The surface is designed to be tough yet resilient so that it tends not to chip when cut even when using a handsaw.

Chip free cutting means board ends can be finished without end caps and mitre joints can be made without joint strips.

POLYBOARD EasyCut windowboard is ideal in conservatories or for finishing window installations. It is available finished in white and a range of wood grains.

Widths vary up to 900mm and lengths up to 5.5m.

Fitting is easy.

- Secure the POLYBOARD windowboard in place with any good quality gap filling building adhesive.
- Finish the reveals if necessary.
- Surplus plaster dropped onto the decorative surface can be easily cleaned off. Non-abrasive household cleaner will remove stubborn dirty marks.

POLYBOARD EasyCut. A better finish - quicker.

POLYBOARD EasyCut is an attractive alternative to painted windowboards. It is extremely scratch and abrasion resistant and has excellent resistance to everyday household chemicals. Also, its surface will not be affected by burning cigarettes.
