VIX VERIFY | greenID

The greenID™ ADVANTAGE

Streamlined Student Identification Solutions

Comprehensive identity verification and access management

SOLUTIONS TO SAFEGUARD ACADEMIC INTEGRITY

- Confidently and securely register staff and student identities online, from anywhere in the world
- Verify the legitimacy of identity credentials and documentation
- Establish secure identity profiles, which include face and voice biometrics, for managing access to systems and facilities

- Use profiles with biometric scanning to:
  - Securely issue credentials such as student cards
  - Record and monitor attendance at exams, lectures, tutorials and other events
  - Manage access to assessment venues and secure access facilities like computer labs
  - Track use of facilities accessed via secure identities for better campus planning
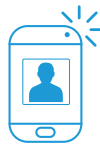

greenID™ leverages mobile technology, biometrics and advanced machine learning capabilities to provide a seamless identity access management system for the Higher Education sector

STAFF AND STUDENT IDENTITY MANAGEMENT

- Remote identity verification supports registration events such as student enrolment, staff onboarding, offer acceptance, entrance interviews and more
- Matching against unique identity profiles increases security for subsequent interactions
- Using biometrics provides an accurate means of identifying individuals which does not rely on remembering passcodes

BIOMETRIC IDENTITY VERIFICATION

- Authentication that is simple and intuitive for your students
- Supporting multiple biometric verification factors including face and voice
- Reduce average handling time per student to maximise productivity
- Low cost, accurate alternative to face-to-face interactions

VERIFICATION OF IDENTITY DATA

- The core of greenID™ is secure, privacy-compliant real time identity verification
- Global coverage from a wide range of trusted data sources
- Configurable verification rules to balance maximising match rates and maintaining compliance
- Continuous data management to maintain reliability, accuracy and coverage

GLOBAL DOCUMENT AUTHENTICATION

- Efficiently extract identity data directly from scanned documents
- Global document library assures document is genuine
- Reduce fraud through accurate automated document authentication

WEB AND MOBILE SYSTEMS INTEGRATION

- Mobile SDK (iOS & Android) includes document scan, data extraction/verification and biometrics
- Straight forward HTML options for web based experiences
- Comprehensive API for integration into your own website
- Standalone web based portal for self-service and customer care implementations

SECURE DATA SERVICES

- greenID™ has been certified as meeting the ISO 27001:2013 standard in Australia
- All data in greenID™ is encrypted in transit and at rest
- Systems are continually updated according to the latest security patches
- Best of breed security mechanisms to block unauthorised access and combat potential DDOS attacks.
