# CONTRACT LIFTING SERVICES

GT Lifting offer full CPA contract lifting services to our clients on request. Work is planned and carried out by our experienced CPCS qualified workforce. We will recommend the safest and most cost effective equipment to carry out your lifting operation.

## Our CPA contract lifting services include:

- Free, no obligation site surveys
- Experienced CPCS qualified workforce: appointed person (lifting operations), lift supervisors, slinger signallers & operators
- Lifting equipment and accessories
- Production of method statements, risk assessments and lift plans
- Goods on the hook insurance of up to £25,000  
*(this can be increased)*

# ROTO TELEHANDLERS

Our fleet of specialist rotating telehandlers can handle loads up to 8 tonnes and working heights up to 46m.

These machines can be fitted with a wide range of standard and specialist attachments, making them ideal for many lifting applications.

- Rotos from 16m to 46m working heights
- Specialist attachments
- Modern fleet with Tier 4 interim and final engines
- Simulated lifts can be carried out on request, enabling precise point loading information

# HEAVY LIFTING

Our fleet of heavy lifting equipment includes machines with safe working loads from 6 to 20 tonnes and working heights up to 10 metres.

These machines are suitable for many varied lifting applications and can be fitted with a wide range of standard and specialist attachments.

- Safe working loads from 6 to 20 tonnes
- Working heights up to 10 metres
- Wide range of standard and specialist attachments

- The vast range of attachments gives rise to a new meaning of versatility for our telescopic handlers
- The correct attachment will offer efficiency, profitability and significant cost saving in many applications
- Specialist attachments for specialist applications
- EN280 compliant access platforms

# ATTACHMENTS

We have an extensive range of standard and specialist attachments to complement the roto and heavy lift fleet, including - buckets, personnel platforms (EN 280 compliant), winches, fly jibs (with or without winches) reduced height crane booms, carriage mounted hooks, extra wide fork carriages, fork extensions, rigger mats, rigger mat carriers, Crossrail compliant DPF systems, machine remote controls, the list goes on!

We only supply manufacturer specific and approved attachments, enabling us to supply load charts for any of the attachments in our hire fleet.
