Windsor Motors

case study

Windsor Motors was founded in 1968 and has since become one of Ireland's leading dealer groups, with over 300 staff and thousands of customers. They sell a variety of new and used cars and are the main dealers for Nissan, Opel, Peugeot, Mazda and Kia. Windsor also offer full servicing facilities in their state of the art workshops.

The Netwatch System was first installed on a Windsor site in Galway in 2004 due to increasing concerns for the safety of their valuable stock at the dealership. Impressed by its effectiveness, Windsor employed Netwatch Systems on a number of other sites. Today Netwatch monitor 14 of the Windsor main dealerships and are the preferred security partner for any new sites coming on board.

Netwatch provide Windsor with extremely cost effective monitoring and remote control of site activity. If a site perimeter is breached, Netwatch issue the intruders with a live personalised audio warning, to deter any criminal activity from occurring on the premises. With no capital cost and just one fixed daily fee, the Netwatch System provides a perfect security solution for Windsor Motors.

Don't just take our word for it - Read what one of our customers has to say ...

"Netwatch has been working with Windsor for years, protecting many of our sites across the country. When we opened up Windsor Opel and Windsor Nissan in the Liffey Valley Motor Mall, there was an existing security provider already on-site. However, we needed a security solution that provided full site protection, so we replaced them with Netwatch, who we knew we could rely on," explains Paul Tier, Dealer Principal of Opel Windsor Liffey Valley Motors.

"When we opened our new site, Windsor Kia Liffey Valley, there was no question of who our security provider would be; Netwatch was the only option for us!"

"Netwatch monitor entire sites and if there is a breach of the perimeter, the Communication Hub are on the case straight away, issuing audio warnings and calling the Gardaí if necessary."

"With Netwatch in place I feel more secure knowing that someone is watching the dealerships when we are not there. The system is far more reliable than security guards and also more cost effective. I love the Netwatch System and I would, without hesitation, recommend it to any car dealership faced with a security challenge," concluded Paul.
