

# Contractor Service Providers PSL

At NRL, we appreciate the importance of our candidates receiving the best possible advice when determining which trading model to use whilst working with us.

Legislation prevents us from providing this advice, yet we appreciate that it is a key decision for many of our candidates and as such we have put together a preferred supplier list. All of the providers included on our preferred supplier list have gone through a stringent compliance audit process that has provided us with the confidence to include them on this list. However, the final decision must be yours.

## Advance Contracting Solutions Limited
