## Chrysanphyton

### Supports Healthy Circulation in Horses

**Chrysanphyton** is a supplement made from *Chrysanthellum americanum*, a dried whole plant that is rich in antioxidants. This supplement is formulated to give support to blood vessels, which helps in keeping them healthy, and promotes the natural process of blood vessel dilation in horses, particularly in the distal limb. Chrysanphyton helps support horses such as Quarter Horses, warmbloods, and Thoroughbreds with foot soreness.
