DESKTOP AS A SERVICE

Desktop as a Service (DaaS) delivers a user's desktop to any device, anywhere in the world. Hosted in our Tier III UK and US data centres, DaaS reduces management cost and complexity while extending the life of the hardware and providing immediate disaster recovery.

Today's organisations can be complex. Not only does growth bring growing IT challenges, but working styles have changed, too. People need access to their applications and data wherever they: on the move, at home or working in the offices of customers and partners. Today's desktop computing doesn't need a desk at all.

Providing your users with the systems they need gets even harder when you have an estate of legacy PCs and a seemingly relentless upgrade cycle imposed by IT vendors.

Many successful organisations now overcome this problem by adopting desktop virtualisation and Desktop as a Service from enablesIT. Using the latest technology, we provide a consistent, reliable and centrally managed desktop image from our secure and resilient data centres. DaaS delivers a consistent, familiar experience to users whether they use a thin-client terminal, a tablet device or a legacy laptop.

KEY FEATURES OF DESKTOP AS A SERVICE INCLUDE:

- Desktop images available and scalable immediately
- Minimal hardware requirements for user access
- Available to a variety of end user devices, including thin and fat client, using industry standard technology
- Easily run pilots and deploy gradually across different business units or user groups
- Proven, mature service
- Central management and control of desktop images
- Hosted in our secure, resilient data centres
- Fully managed and monitored 24/7 by enablesIT
- Predictable pay-as-you-go operating cost model

BENEFITS:

- Avoid hardware upgrades and extend the life of legacy PCs
- Reduce lifecycle costs with power-efficient, long life, thin-client terminals
- Accelerate innovation and project delivery with additional desktops available on demand
- Gain control over software licence compliance
- Build greater organisational resilience and disaster recovery with desktop systems available anytime, anywhere, on any device
- Replace large, fixed and up-front capital expenditure with our predictable pay-as-you-go operating cost model
