

# So Many Uses!

## Fire-Retardant Paint Additive

Flamecheck M-IIIIPA is a “Class A” fire-retardant paint additive for latex and acrylic paint. (Tested with most major brands.)

### Easy To Use

Flamecheck M-IIIIPA is easy to use. Simply add 8 ounces of Flamecheck M-IIIIPA to 1 gallon of interior or exterior latex paint. Mix thoroughly, do not dilute.

- ✓ Gives a “Class A” fire rating on the paint coating.
- ✓ Can be used on any paintable surface.
- ✓ Once added Flamecheck M-IIIIPA will render the paint unable to support combustion.
- ✓ Unlimited shelf life in a sealed container. Do not allow to freeze.

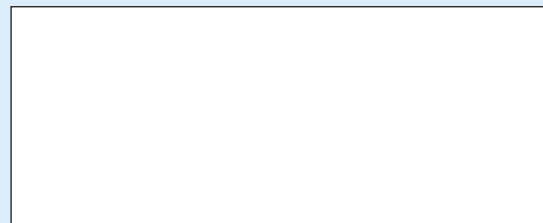

### Tested & Proven:

ASTM E-84 ZERO Flame Spread  
& ZERO Smoke

Flamecheck M-IIIIPA passes ASTM E-84 Steiner Tunnel test with a “Class A” rating. ZERO flame spread and ZERO smoke over a non-flammable substrate.

When painting wood or fabric (stage), treat absorbent substrates with Flamecheck M-III prior to painting for added protection.

# Approved for Residential and Commercial Applications

## Color & Sheen

Will Flamecheck M-111PA change the color or sheen of the paint I use? No, Flamecheck M-111PA will not change the color or sheen of the paint it's added to.

## Coverage

Mix 8 oz of Flamecheck M-111PA into 1 Gallon of paint, coverage is 300-400 sq. ft. per coat, apply two coats to achieve a "Class A" finish.

Always test your application to insure it meets the expected standard.

## Application

High quality paintbrush or professional roller is acceptable. For larger jobs an airless spray gun is recommended.

## Non-Toxic

Flamecheck has been manufacturing non-toxic fire retardant products since 1985.
