

A COMPLETE AFTERMARKET OFFER OF AIR CONDITIONING PARTS >

Nowadays almost all new produced cars are equipped with an air conditioning system. This means that the maintenance and repair of an air conditioning system is daily business for most garages. With a wide product range over 8.000 products and the benefits of Easy Fit, NRF is your partner for all engine cooling and air conditioning parts. But NRF is more than just a supplier. With extra services such as TECHsupport, NRF creates added value for the workshop.

Extensive range of compressors and condensers

NRF COMPRESSORS >

Even the smallest piece of dirt (micron size) can have negative effects on the performance of a compressor. To achieve the highest quality, the production process of NRF compressors is a very strict process.

Each compressor is subjected to a number of stringent tests. Therefore NRF guarantees a reliable and durable product. The total NRF compressor range consists of 1.000 pieces. NRF offers both original (OE) and aftermarket compressors. You can see the difference in the part number. When a part has a 'G' as addition, it's the Genuine (OE) part.

Benefits of the NRF compressor range:

- Largest aftermarket compressor range
- Meet or exceed 100% OE performance
- Available as OE and OE-equivalent
- Prefilled with the correct PAG-oil
- All new - no remanufactured parts
- An Installation manual is supplied with each unit

NRF CONDENSERS >

NRF condensers are known for their excellent performance and durability. With a product range of more than 800 condensers, NRF is covering over 3.700 OE references. This results in a car park coverage of almost 90%. To assure maximum performance, the original systems like PF (Parallel Flow), serpentine or tube & fin are also used in the aftermarket version.

Benefits of the NRF condenser range:

- Easy installation by perfect product fit
- 85 % of condensers including receiver drier
- 100% helium leak-tested
- Fast movers available as Easy Fit
- Manufactured and tested to match OE quality

In addition NRF supplies a wide range of evaporators, heaters, receiver driers, interior blowers and smaller parts, such as expansion valves and pressure switches.

The **art** of cooling >

Image: Easy Fit references are supplied with assembly materials, such as O-rings, adaptors, clamps and clips.

NEW - COMPRESSOR CLUTCH PARTS AND BLOWER MOTOR RESISTORS

Recently NRF added compressor clutch parts and blower motor resistors to the range. NRF supplies 59 compressor clutches for fast moving compressor references. The blower motor resistor range consists of 78 part numbers, covering over 300 OE references.

NRF TECHsupport - technical and sales trainings

Due to the rapid development of automotive systems it's important for mechanics to keep the knowledge about engine cooling and vehicle a/c systems up-to-date. NRF offers technical and sales trainings on location. These trainings include the function of the cooling parts, diagnoses, maintenance and installation. NRF organizes more than 150 trainings per year.
