

WE ARE DRINKWARE

WE ARE **NOW**

Why Drinkware?

You use it at home. You use it in transit. You use it at the office. Drinkware is one of the few advertising vehicles that is used in equal parts in these three domains, making it a powerful promotional solution; however, there's also power in the personal nature of the product.

Chances are good that you own a favourite coffee tumbler. It's *yours*, it's part of your morning routine. It's something you won't leave the house without. You have developed a personal connection with that coffee tumbler. You love the colour, you love the way the handle fits perfectly in your hand. You adore the way your tumbler slides effortlessly into your cup holder or, you may love how easy it is to wash. Whatever the case, you know that tumbler, inside and out.

Specialty coffee shops and big box retailers have catapulted drinkware into popular culture consciousness. Is there a coffee shop in the world that doesn't also sell drinkware? Even bookstores sell drinkware these days, often at shockingly high price points. The consumer demand for drinkware has never been higher.

We've been keeping our ear to the ground.

We have all the trending drinkware styles, manufactured using the latest technology. We have developed proprietary, top-rack dishwasher-friendly decorating techniques to make sure your brand looks brilliant on them. We pride ourselves on our industry-leading inventory levels and rapid delivery options. We have even designed new, funky retail packaging.

We invite you take a look at a few of our selections in this brochure, while making sure to check out the full array of drinkware on our website, www.debcosolutions.com.

Bottoms up!

Unique Decoration

Aqua Mark

Aqua Mark allows for stunning multi spot colour transfer logos on ceramic, glass, porcelain, stainless steel, and Tritan drinkware. Perfect for PMS colour matching.

HD Aqua Mark

HD Aqua Mark is the same as Aqua Mark but is produced with a digitally printed logo for full colour glory. One run charge for unlimited colours!

XL Screen Print

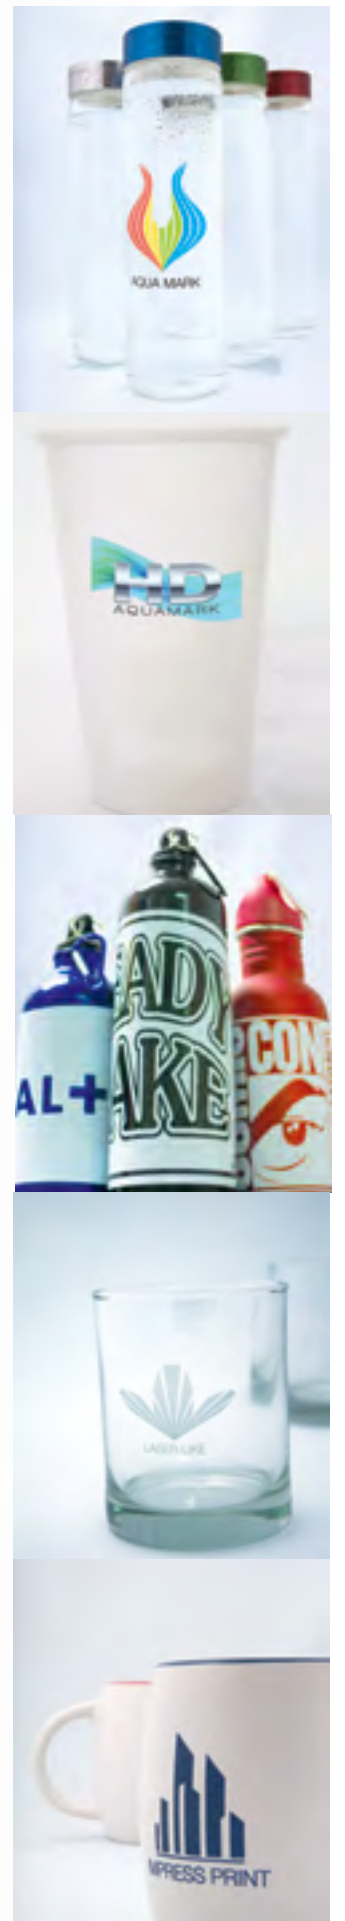

We've taken Screen Print to the next level. Wrap select drinkware pieces in a extra large screen print. Differentiating and making your logo stand-out on drinkware has never been so simple!

Laser Like

Laser Like looks like laser engraving, but is done as a screen-print. Get all the elegance of laser engraving, at a fraction of the price.

Impress Print

Impress Print produces an elegant, raised and frosted look, using a proprietary ink dust coating application. It is an original look and texture you won't find anywhere else!

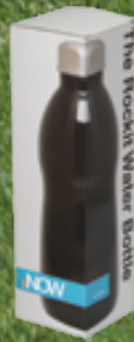

Health & Wellness

Surveys show that 50% or more of employers offer some type of health and wellness program. Among large employers, 60-80% do so. Nike, HBO, Forbes, Google, MTV and IBM all support workplace yoga programs. Why? A Conference Board study has shown that for every \$1 invested in workplace health and wellness an organization can expect to return \$3 in cost savings, when measured in worker productivity and reduced absenteeism due to illness.

Schools & Sports

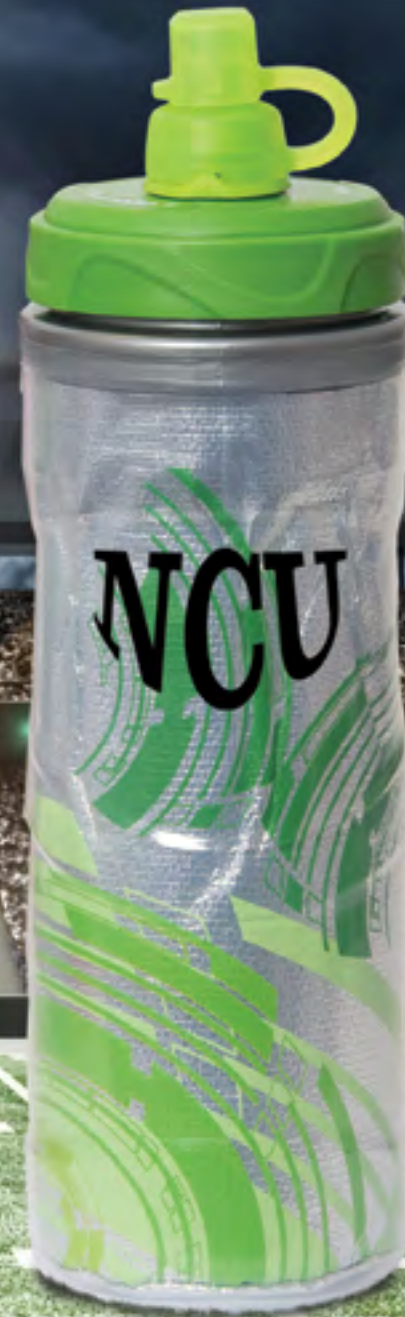

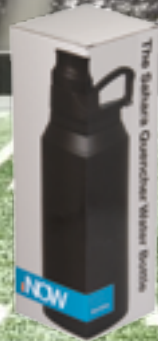

There are over 2,700 universities and colleges in North America with over 22.3 million students enrolled at those institutions. When you add high schools, grade schools, and sporting leagues to the equation, the numbers are staggering. Oh – and don't forget that each of those schools and sport teams has a fan base! The perfect drinkware piece means they'll be showing their team colours every day.

Financial & Insurance

Your bank teller has an acrylic tumbler at his terminal. Your insurance agent sips coffee from a mug while going over your insurance options. The CEO of a brokerage house drives to work with her favourite coffee tumbler. Whether it's used in the home, in transit, or at the office, the simple fact is that promotional drinkware has the ability to advertise your brand in multiple settings.

Clubs & Associations

No condensation rings

No condensation rings

Trendy Camp-ware design

Wrap-around imprint available

Private associations and clubs march to the beat of their own drum. They are careful about their image and have a clear idea of their mission. Using promotional drinkware in this sector provides a fantastic way to promote a vision, recruit like-minded individuals, and raise critical mission awareness.

North Americans throw away an astonishing average of over 25 billion paper cups *every single year*. For every four paper cups manufactured there is the equivalent of 1 pound of CO₂ emissions. To create a single paper cup it takes 43 grams of wood, 4.1 grams of petroleum and 1.8 grams of chemicals.

A person saving a single paper cup a day for 40 years will save 24 trees. Multiply that by the number of members in your association, and the numbers become staggering. Eliminate every paper cup for all members and your organization begins to change the world.
