

metroSTOR **PBM** Bin Storage Units (660L-1280L Waste & Recycling Bins)

### metroSTOR Waste & Recycling Storage Products

metroSTOR waste & recycling storage facilities are an essential tool in the control of both residential and commercial waste-streams; increasing recycling rates and eliminating cross contamination while raising the profile of our communities with proven reductions in litter, fly-tipping and anti-social behaviour. Reduced fire risk is achieved with metroSTOR products providing secure storage for waste and recycling bins away from the property ensuring that fire is contained in the event of a bin being set alight.

### metroSTOR PBM Bin Storage Units (660L-1280L Waste & Recycling Bins)

The original metroSTOR PBM is an iconic product, highly successful in operation wherever the ubiquitous 4 wheeled bin is in use, enclosing and controlling access to the waste stream deposits. Now in its 3rd generation; improved usability, more effective recycling with a greater choice of standard and retro fit apertures, revised access control options and a wider range of cladding finishes establish metroSTOR PBM as the king of bin stores.

With operational feedback ever the driver for design development, metroSTOR PBM is currently produced in 4 product series ensuring there is a unit that efficiently accommodates the bin type in use by your organisation. metroSTOR PBMN is designed for 660L units, metroSTOR PBMC accommodates the taller Chamberlain 720L and 940L 'chute' bins and metroSTOR PBMT the commonly used Taylor 1100 Continental. Where a variety of bin types are used and footprint is not the primary concern, the standard metroSTOR PBM can take all 4 wheeled bins from 770L – 1280L capacity with a spacer bar fitted internally to keep the bin close to the loading aperture.

metroSTOR PBM has always offered class leading levels of adjustment in unit ground fixings points for slopes and varying site conditions reducing expenditure on enabling groundworks. The 2019 model takes this advantage further with metroSTOR base plinth design accommodating permanent fixing to the majority of firm and stable substrates without additional foundations.

#### Durable Construction

metroSTOR products are manufactured to ISO9001:2008, ISO14001 and BS EN 1090 CE Marking designed and manufactured for long life. The all-steel frame is Hot-Dip Galvanised to BS EN 1461.

#### Fast Delivery & Installation

Limited standard specification units available within a 2 week lead when ordered with our Fastrack package.

#### Access Control Options

A highly configurable lock case accommodates latch only, lock or deadlock with key management and keypad options.

#### Avoid Waste Stream Contamination

Specify from 5 aperture options for specific waste and recycling streams; cardboard only, bottles only, bagged recyclables, non-bagged recyclables and general waste..

#### Outstanding Whole Life Costs

Unit cladding panels are recyclable at the end of product life and metroSTOR PBM steel frame can be factory refurbished with replacement cladding and fittings as site conditions dictate.

#### Ground Fixing System

Relocatable as site requirements change over time. metroSTOR base plinth design enables swift and economical installation on uneven surfaces.

metroSTOR PBM Series Bin Storage Units

metroSTOR PBMN Series Bin Storage Units

Model:	PBM 1	PBM 2	PBM 3	PBM 4	PBM 5	PBM 6

#### Greenroof

Wild® Greenroof Systems can be specified on most types of metroSTOR® product. They provide a great opportunity to create pockets of biodiversity, bringing the enriching and enlightening natural world closer to our everyday lives, entirely within the footprint of your storage unit.

#### Fire Safety

metroSTOR products can be specified to meet relevant fire risk assessment criteria. Our fire retardant options for TGV and sheet type cladding have a Fireboard MgO internal liner with either treated SW timber, HDPE 100% recycled plastic or coated steel panel outer to provide Euro-class A1, UK class 0 reaction to fire. The panels are manufactured from materials of limited combustibility throughout to provide 30 minutes fire resistance to BS 476. Where fire retardant properties are required for an open-spaced cladding type, SE timber plank can be specified with an HR Prof treatment process providing a Euro-class B, UK class 0 Reaction to Fire classification.

#### Aperture Type Full Height Door

- Suitable for Resident and Warden Controlled Applications

#### Aperture Type General Waste

- Allows Bagged Waste or Recycling

#### Aperture Type Cardboard Only

- Allows Only Non-Bagged Cardboard
- PPC Colour Finish Optional

#### Aperture Type Bottle Only

- Allows Only Non-Bagged Bottles
- PPC Colour Finish Optional

#### Aperture Type Mixed Recycling

- Allows Only Non-Bagged Recycling
- PPC Colour Finish Optional

#### Aperture Type Recycling

- Allows Bagged and Non-Bagged Recycling
- PPC Colour Finish Optional

#### Latch Only

- Self-Latching Daybolt
- No Bolt Lock

#### Latch + Eurocylinder Key Lock

- Self-Latching Daybolt
- Eurocylinder Key-operated Self-Latching Bolt Lock

#### Latch + Triangle Key Lock

- Self-Latching Daybolt
- Triangle Key-operated Self-Latching Bolt Lock

#### Latch + FB2 Key Lock

- Self-Latching Daybolt
- FB2 Lever Key-operated Self-Latching Bolt Lock

#### Latch + Code Secure Lock

- Code Secured Entrance
- Mechanical Code Lock

#### Slide Bolt + Padlock

- Self-Latching Daybolt
- Integral Slide Bolt / Handle with Padlock Provision

**Please Note:** While every effort is made to ensure product information is accurate and informative we advise that this is used for reference only. Street-space Ltd reserve the right to change the design, material and specification of metroSTOR products at any time.

metroSTOR is the leading outdoor storage system for today's built environment, delivering social, economic and environmental value. Combining superb aesthetics with durability for the toughest environments, metroSTOR offers a configurable, modular product system to comprehensively address the challenges of outdoor storage; from waste and recycling bins, mobility scooters and cycles to household items, site equipment and service plant enclosures.

#### Mobility Scooters

metroSTOR PSL, PSM and PSH provide space-efficient, mobility scooter storage with user-friendly integral battery charging, making for safer communal areas while helping users to maintain their independence.

#### Waste & Recycling

metroSTOR PBL, PBM, PBE, PBC and PBH products help control waste-streams with robust enclosures and stores for all standard bin sizes. Their smart appearance and unobtrusive physical profile enable recycling centres to be located in spaces that may not have previously been considered.

#### Household Items & Site Storage

metroSTOR PTL, PTM and PTH are tough, versatile products providing attractive, secure storage for equipment and bulky items in an unobtrusive design. Highly configurable for capacity, layout, access, security and finishes, the proven modular system makes for ease of specification.

#### Cycles & Motorcycles

metroSTOR PCL, PCM and PCH for custom cycle parking solutions with the efficiency of modular build from transit shelters to cycle hubs. Stands, racks and carousels can all be specified with a number of options available for roofing, enclosure and layout type, finishes and access control.

#### Service Plant & Industrial

metroSTOR Custom Build is driven by the inherent design flexibility of our products, working in partnership with client input informing the design process. This enables the development and delivery of effective solutions, achieving a consistent design aesthetic.
