

# WOULD YOU LIKE TO FIND THE BEST 'FIRST' FLUTE FOR YOUR STUDENTS?

We share your desire.

As a professional, you know the difference that a good quality instrument can make to your student's enjoyment and progress. And you'll also know that the better, faster progress they make, the more likely they are to carry on playing and learning.

So, it is with this in mind that Trevor James created the 10x Student Flute. Turn over to **discover how** the 10x flute can help your students play and learn for longer.

# SO WHY IS THE TJ10X THE BEST FLUTE FOR YOUR STUDENTS?

There are 4 things to consider when guiding your pupil toward their first flute:

- **Affordability** – As it's a first flute, they don't need to spend a fortune.
- **Playability** – The instrument should be easy to blow and have a smooth action.
- **Longevity** – Your student's new flute should be well made using quality materials.
- **Reliability** – And their flute needs to last from the first lesson thru their first few grades.

*"What a fantastic flute! I recommend the TJ 10x flute as the best 'first' flute above all others"*

- Clare Southworth, Professor of Flute, Royal Academy of Music

You can be confident that the 10x flute will be the best choice for your students.

- **THE HEADJOINT IS REALLY 'FREE-BLOWING'.**

The unique lip plate has angled shoulders (sides) which means it's that bit easier to get a good tone, especially in the tricky lower registers.

- **ITALIAN, 'PISONI' PADS.**

No air leaks or dodgy notes due to poor generic pads. These Pisoni pads are the same as used on the majority of premium Japanese flutes.

- **JAPANESE TUBING**

Unique on a student instrument, the TJ10x uses similar Japanese tubing to the premium brands. This specially resonant and consistent tubing forms the strongest possible tonal core.

- **EXCELLENT AND INNOVATIVE SILVER-PLATING PROCESS**

There'll be no worries about de-plating or tarnishing. Your student's TJ10x is first coated in copper before getting two (yes two!) coats of silver-plate.

- **UNIQUE MANUFACTURING PROCESS AND FACILITY.**

Trevor James flutes are not the same as 'every other student flute'. We have our own manufacturing in Taiwan that makes only TJ flutes, to our exacting standards.

- **EACH FLUTE IS CHECKED AND SETUP 'READY TO PLAY' IN KENT, UK.**

Every single flute, from student to professional grade is setup by our team of experienced and highly qualified technicians at TJ's headquarters in Lenham, Kent. And again, unlike any other student flute, we can trace exactly who setup and cared for your flute from the point of original manufacture.

So, speak to your local music store about the TJ10x Flute. You'll be pleased you did.
