

B & H LABELER EVALUATION SERVICES

B & H LABELING SYSTEMS offers a full range of Labeler Evaluation Services for B & H labelers regardless of their age, condition, model or location. Labeler evaluations can be performed on both production labelers and on labelers that are no longer in production. Every B & H labeler evaluation is conducted by a highly trained B & H Field Service Engineer using a structured process that inspects and assesses up to 150 machine parts and components that impact speed, labeling quality and labeler uptime.

LABELER EVALUATION SERVICES

B & H offers three Labeler Evaluation Services for B & H labelers regardless of the age, condition, model or location of the labeler:

- Audits
- Field Assessments –
With Power & Compressed Air
- Field Assessments –
No Power & Compressed Air

The circumstances of a labeler at the time of an evaluation dictate the most appropriate evaluation service. Audits, the most comprehensive labeler evaluation service, are performed on production labelers. Field Assessments With Power & Compressed Air are performed on out of production labelers that can be powered-up for the evaluation. Field Assessments With No Power & Compressed Air are performed on labelers in storage that cannot be powered-up for the evaluation.

EXPERIENCED & THOROUGH

B & H Labeler Evaluation Services are completed by highly trained and experienced B & H Field Service Engineers. They use a structured inspection process that examines up to 150 labeler components that impact speed, labeling quality and uptime.

FULLY DOCUMENTED RESULTS

The results of B & H Labeler Audits are reported to the customer through three related documents:

- Machine Evaluation Worksheet
- Change Part Evaluation Worksheet
- Technical Notes

Labeler Evaluation documentation can also be used by B & H Inside Sales Coordinators to generate parts and / or service quotations for the components and labor necessary to restore the labeler to production condition.

DISCOUNTED ALL-IN PRICING

B & H Audits and Field Assessments are offered with discounted all-in prices based on the number of labelers to be evaluated. This convenient, flat rate price structure includes labor, travel time and all travel expenses. It couldn't be easier. And the flat rate structure makes it easy to budget labeler Audits and Field Assessments. Flat rate, all-in prices are available for Audits and Field Assessments ordered at least 21 calendar days before the scheduled evaluation.

WHY EVALUATE A LABELER?

B & H customers and prospective customers require professional and thorough evaluations of B & H labelers for a variety of reasons. Current customers may need to improve the performance of an older labeler or they may need to assess the condition of a labeler before it is relocated to another facility. Current customers selling a B & H labeler may also want to document the condition of a for sale labeler to make it more attractive to potential buyers. And on the other side of the coin, prospective customers in the market for used B & H labelers may want to better understand the condition of a labeler before making an important purchase decision.

Whatever the reason, B & H offers Labeler Evaluation Services that can help both current customers and prospective customers.

LABELER EVALUATION SERVICES HIGHLIGHTS

- Labeler audits and assessments are available for all B & H labelers regardless of age, model or location
- Field Assessments are available for labelers no longer in production
- Audits are performed on labelers currently in production
- Audits & Field Assessments are completed by highly trained B & H Field Service Engineers
- Structured inspection process examines up to 150 machine components and parts that impact speed, labeling quality and labeler uptime
- Audit & Field Assessment results are formally and fully documented
- Audit & Field Assessment results can be used to generate quotes for required spare parts and / or service
- Audits & Field Assessments are a great investment for production labelers, and for sellers and buyers of pre-owned labelers
