

Casting

At Brooks forgings we can fulfil all your metal component requirements by using many manufacturing processes, this includes casting. With over 45 years of experience you can trust us to meet your requirements for cast components. We are able to supply from the following materials and process types.

Casting Materials:

- Ferrous
- Non-Ferrous
- Aluminium

Casting Processes:

- Green Sand
- Investment
- Lost Wax
- Lost Foam
- Pressure Die
- Powder
- Resin Sand

Our engineers will be able to help you decide on the right casting process for your components and help in the design and testing too. We have successfully helped customers replace fabricated components with cast components saving money and supplying a better looking and better quality product. All this work is carried out under the control of our ISO 9001 quality system.
