POLIFILM EXTRUSION PRODUCT PORTFOLIO

TECHNICAL FILMS

Technical films are used e.g. as laminating films, in the production of food or animal feed packaging. They can be found in packaging in the pharmaceuticals and medical industry, or as the basis for labels in the cosmetics or cleaning agent industry. As carrier films for coating, technical films are the carrier material for adhesive in protection films, and are used in the automotive industry amongst other things.

- Sealant films
- Label films
- Carrier films

Thickness: 25 - 200 µm Width: 500 - 2,600 mm

STRETCH FILMS

Stretch films provide the optimum solution for every application, by forming safe and stable loading units for transports. Stretch films offer all-round protection from moisture, humidity, dust, UV rays and even theft when dyed.

- Machine films
- Manual films
- Manual films, pre-stretched
- Stretch adhesive tape

Thickness: 8 - 50 µm Width: 235 - 2,000 mm

CONSTRUCTION FILMS

Construction films for applications in the construction industry. The spectrum ranges from regenerated film for construction sites to high-quality film for roof substructure, for reliable insulation and a high standard of housing quality.

- Construction films
- Vapour barrier films

Thickness: 30 - 500 µm Width: 1,000 - 12,000 mm

POLIFILM EXTRUSION PRODUCT PORTFOLIO

SPECIALTY FILMS

Functional packaging solutions, individually tailored to the specific requirements of your industry.

- POLISAVE protection films (VCI, ESD)
- Paint protection films
- Insulation packaging
- Dust & dirt protection
- Non-woven lamination films
- Tight packaging films
- Cargo films
- Despatch and transport packaging
- Hygiene article packaging
- Beverage packaging

Thickness: 7 - 350 µm Width: 4 - 6,000 mm

AGRICULTURAL FILMS

Agricultural films offer individual solutions, to ensure the optimal recovery of the harvest and higher yield. They also fulfill the highest standard of protection in the ensilaging process, and amongst other things are used in driving silos, or for the production of baled silage.

- Silage sheets
- Underlayer films
- Side wall films
- Agricultural stretch films
- Asparagus films
- Greenhouse films
- Peat films

Thickness: 20 - 200 µm Width: 500 - 18,000 mm
