

Discretionary Managed SIPP Model D5

01 May 2019

This SIPP model will invest exclusively in holdings that we anticipate will exhibit more defensive qualities when compared to equities. This may involve (but is not limited to) corporate bonds and convertible bonds for example. This strategy may be appropriate for investors who want very limited direct exposure to equity markets whilst still acknowledging that market volatility will impact their SIPP valuation. There will be a bias towards developed and liquid capital markets.

Top Ten Holdings	%	Sectors

* Certain collective investments that we purchase (mainly Investment Trusts) will benefit from their own underlying investment management for which a small additional charge will apply.

** This takes account of the 1% charge on purchases and 2% on sales and assumes a 15% annual turnover of holdings. On certain shares, Stamp Duty of 0.5% will also apply to purchases, which this figure also includes.

*** Subject to our agreed notice period to enact stock sales being acceptable

For full confirmation of our charging terms and conditions, please refer to our Discretionary Client Agreement.

Risk Warning

Past performance is not a guide to the future. The capital value of units and the income from them may fall as well as rise. Yield figures may vary and are not guaranteed. Where a fund holds investments in another currency there may be additional risks due to exchange rate fluctuations. Specific clarification, individual advice and consideration of full terms and conditions is necessary if action is being considered. An investor may not get back the amount invested.
