Payment by credit card is available.

**Directions to The East India Club,
16 St James's Square, London, SW1Y 4LH
Tel: 020 793 1000**

The nearest underground stations are Green Park and Piccadilly Circus. From Green Park walk towards Piccadilly Circus and past the Ritz. Turn right down St. James's Street then turn left along King Street and left again onto St. James's Square. The East India Club is on the left, no. 16.

From Piccadilly Circus, turn down Lower Regent's Street and immediately left along Jermyn Street then left down Duke of York Street to St. James's Square where you turn right into the square with the club directly ahead of you.

The East India Club has no signage on the outside of the building. The club's dress code requires men to wear a jacket and tie and for ladies to dress 'smart casual' but no jeans!

Training Faculty:

Dr. Graham David Ross Martin M.B., Ch.B GMC No: 2427940
MEMBER OF BRITISH MEDICAL LASER ASSOCIATION
MEMBER & EXAMINER OF COSMETIC DOCTORS ASSOCIATION

Dr. Martin's interest in dermatological lasers started in 1990 when, along with several other doctors in the UK, he recognised the potential for the use of the Q-switched ruby laser for the removal of tattoos, a significant problem for many people. He started one of the first centres in Europe to offer this technology and was part of a national organisation called Laserase, which introduced the concept of simple, affordable laser surgery for laser tattoo treatment.

Dr Martin has co-owned clinics in Nottingham, Sheffield and Hull. He has provided laser consultancy services to some of the largest and smallest light therapy providers, covering many parts of the country. He is currently medical advisor to a large chain of high street providers and has produced medical laser treatment protocols for numerous light-based devices.

Dr. Martin has now had many years experience of thousands of treatments using Q-switched ruby and Q-switched frequency doubled Nd:YAG lasers and has delivered workshops on these treatments in UK and Europe.

Dr. Godfrey Town Ph.D.
INDEPENDENT RPA2000 CERTIFICATED LASER PROTECTION ADVISER (LPA)

Godfrey Town is a clinical technologist and scientist specialising in the comparative measurement of IPL and laser devices. He is a regular invited speaker at international aesthetic laser meetings and has published scientific and clinical papers in international peer-reviewed journals on the use of laser and intense pulsed light (IPL) devices.

Godfrey runs international workshops and training courses for healthcare professionals and therapists in private practice providing applications training for users of light-based technology for hair removal, facial skin rejuvenation, acne management and the treatment of benign pigmented and vascular conditions.

For five years, he was an owner-manager of a successful UK private laser & IPL clinic. In the United Kingdom, his LPA consultancy supports over 300 private medical practices, clinics and spas using more than 350 laser and pulsed light devices for whom he also provides applications and accredited 'Core of Knowledge' training, clinical protocol, regulatory and safety procedure support.
