

# VACUUM TRUCKS & ROLL OFF BOXES

OMI Environmental Solutions (OMIES) has a large diversified fleet of trucks, trailers and equipment and over 20 years of experience in environmental and waste transportation. OMIES' truck and equipment operators undergo extensive training including DOT and USCG regulations. They are fully licensed to transport hazardous materials, experienced, professional and ready to meet your needs 24/7.

## AIR MOVERS

Air moving is a vacuuming process by which materials contained in tanks, containers and surface impoundments are loaded by pneumatic conveyance. The air mover can convey almost any material that will fit in an 6 inch hose. A few examples are bricks, grease and tar, wood chips, heavy sludge found in lift stations, and sewer mains and many forms of dry material. Also, they are much faster than labor and more versatile than utilizing a liquid vacuum truck.

**OMIES has SOLUTIONS for all of your environmental transportation needs.**

## VACUUM TRUCKS

OMIES has 70 bbl. and 130 bbl. vacuum trucks. Vacuum trucks can be used on all forms of sanitary waste disposal including contaminated soil, for exposing underground utilities, and for the cleaning of storage tanks and spills. They are also an important part of drilling oil and natural gas wells. Vacuum trucks are used to remove drilling mud, drilling cuttings, cement, spills, and for removal of brine water from production tanks.

## ROLL OFF BOXES

Roll off boxes or dumpsters are ideal for debris from construction, demolition, remodeling projects, manufacturing or industrial facilities, remediation and cleanup. OMIES has roll off box rentals for every project. With timely delivery and pickup, OMIES can handle the transportation and disposal as well.
