## Royal Brompton Hospital | Case Study

*The Royal Brompton and Harefield NHS Trust*

The Royal Brompton and Harefield NHS Trust is the largest centre for the treatment of heart and lung conditions in the UK. They were seeking to implement a ward based patient records system to allow medical staff to have up to the minute access to patients data.

As with most modern hospital wards, space was at a premium. Without any floor space available to house the new systems a zero footprint wall or desk mounted solution was required. Internal cable management was also a key factor in reducing dust collection points. After assessment of each ward, it was decided that a combination of both desk and wall mount solutions would be needed along with CPU housing's.

After defining the key objectives with the Royal Brompton Hospital it was decided that the ICW Elite combination monitor and keyboard solution would exceed all criteria's. The EMEL5220WMQ1-0-3 provides a massive 1066mm of gas assisted height and reach adjustment. All cables are routed internally through the arm.

This solution allowed for both sit and stand operation and medical staff are now able to comfortably access up to the minute patient records with ease.

### Part List:

EMEL5220WMQ1-0-3

Elite Monitor & Keyboard  
Wall Mount  
Composite  
Medical White

### Additional Services:

Installation
