

S.28 Watertight Door

Our Series 28 door is Watertight and suitable for all heavy duty applications. It has a stylish appearance, yet it is strong and reliable. This door is suitable for engine rooms, watertight bulkheads and machinery spaces.

This door is constructed from robust aluminium frame sections and is fitted with heavy duty cast handles to ensure there is a reliable watertight seal.

The Series 28 door is made to custom sizes, has 3 to 6 dog options, has a link-operated dogging system, welded frame, 150mm radius corners, and a internal removable panel.

There is also the option of sound proofing, lockable from the inside only, glazed cast port and internal frame trim.

To complement the doors' surroundings, both the outer frame and door panels are powder coated in a wide range of colours.
