SHADING EFFICIENCY

Transmittance is the amount of light and heat transmitted beyond the fabric. The lower the amount, the greater the efficiency.

Block/reflect is the amount of heat and light that is blocked or reflected. The higher the amount, the greater the efficiency.

Absorption is the amount of heat and light absorbed in the fabric. The higher the amount, the lower the efficiency.

Ultraviolet protection illustrates how protective the fabric is in protecting against ultraviolet rays. The higher the amount, the greater the effectiveness.

CANIS

The Northgate Canis fabric is designed for areas where a high level of solar control is required along with exceptional performance characteristics. Whilst reducing solar glare, the comfort of natural light is still maintained. With 7 colours along with one of the most advanced production procedures, the Flame Retardant fabric is designed with the commercial, educational and healthcare environments in mind.
