

Mail Integrity Platform (MIP)

Another bespoke innovation by MTS

Designed to provide an audit trail of every mail pack by time and date stamp.

KEY FEATURES & BENEFITS:

- ❑ Builds on existing investment – incorporates architecture, which gives it the flexibility to work with an inserter from any manufacturer
- ❑ Audit trail - as it reads a code through the window of an envelope, the data is captured, which can be either cross checked against an existing database or creates a database, providing an audit trail and management data of every mail pack
- ❑ Incorporates the latest scanner technology, capable of dynamically reading an OCR 'A' & 'B', 1D & 2D Data matrix codes.
- ❑ Divert bin - maintains productivity by avoiding nuisance stoppages
- ❑ Incorporates a dedicated monitor, which provides the operator with real time information, alerting to errors as they occur, enabling quick rectification and minimising down time.
- ❑ The same architecture can be expanded to provide the following added functionality:
 - Two way camera matching on the host machine
 - Activate a mail sort kicker to identify mail breaks on the output conveyor

SPECIFICATION:

Length – 1530mm x
Width – 430mm x
Height adjustable to suit the host machine

Envelope size – DL, C5 & C4

Reads from either above or below

Read rate – Up to 18k per hour

Management data:

- CSV file of all items processed
- PDF detailed report by Job number to include time, date, operator, pack id, job number etc.
- PDF summary report by Job number
