SPRINT
GROUP

Alongside our bespoke design and installation packages, Sprint Group provides a refurbishment service to restore your working environment to tip-top condition.

Our meticulous and 'no stone unturned' service is ideal if you require a kitchen upgrade rather than a complete makeover.

Whether you need a new floor or ceiling, a new ventilation system or new items of equipment to blend seamlessly into your existing kitchen layout, Sprint Group can help.

Strip out

Our specialist and experienced team of catering, refrigeration engineers will remove kitchen equipment at a time to suit you, whether it is during the day or overnight to minimise downtime.

Deep cleaning

Restaurants, bars and any establishments working in the commercial food sector must comply with strict hygiene standards under the Health and Safety Act and Food Hygiene Act.

Daily kitchen cleaning routines will maintain a good level of hygiene but over a period of time difficult to reach surfaces including walls, ceilings, lights, equipment and kitchen fittings can become a potential breeding ground for harmful bacteria.

The Sprint team can thoroughly clean all of these areas, eliminating burnt on carbon and fat deposits and helping to extend the life of your kitchen equipment.

Storage

Our total care service includes secure storage of your kitchen during a refurbishment or floor replacement, if required.

We will clean and test your kitchen in our dedicated 17,000 square foot warehouse and cleaning facility before consolidating and re-installing.

Loan equipment

As a partner of Sprint, you will have access to an extensive stock of loan equipment we hold on site including:

- Refrigeration equipment
- Mobile coldrooms
- Freezer rooms
- Cooking equipment

We offer this service to our existing client base as we fully appreciate the need to reduce downtime.
